Information Overload

Microsoft

A word cloud of various information sources arranged in a circular pattern. The words are in white, bold, sans-serif font. The sources include:

- Spreadsheets
- Scorecards
- IM/chat
- Newspapers
- Financial reports
- Documents
- Meetings
- Email
- Portals
- Business books
- Slide decks
- Webcasts
- Presentations
- RSS feeds
- Project plans
- Intranet
- Blogs
- Dashboards
- Magazines
- Analytic applications
- Television reports
- Internet
- Charts and graphs

Business Intelligence Summit 2007

The Execution Gap...

- 95% of a typical workforce does not understand how the organizational goals and objectives relate to their jobs
- 90% of organizations fail to execute their strategies successfully
- 86% of teams spend less than one hour per month discussing strategy
- 60% of organizations do not link their strategies to their plans and budgets

Conventional Thinking... Conventional Results.

Gartner Survey of 1,400 CIOs

1,400 CIOs in more than 30 countries representing \$90B+ in IT Spending

Gartner: “Business Intelligence will surpass security as their [CIOs] top technology priority this year.”

InformationWeek article on BI Spending

- Less than a quarter of workers use BI software today
- Only 8% report more than half of employees use BI software
- But, 38% say more than half of their employee's will use BI software in two years

Our Vision: BI for Everyone

YESTERDAY...

Specialized
BI Tools

TODAY...

BI for
Everyone

BI For Everyone

Microsoft

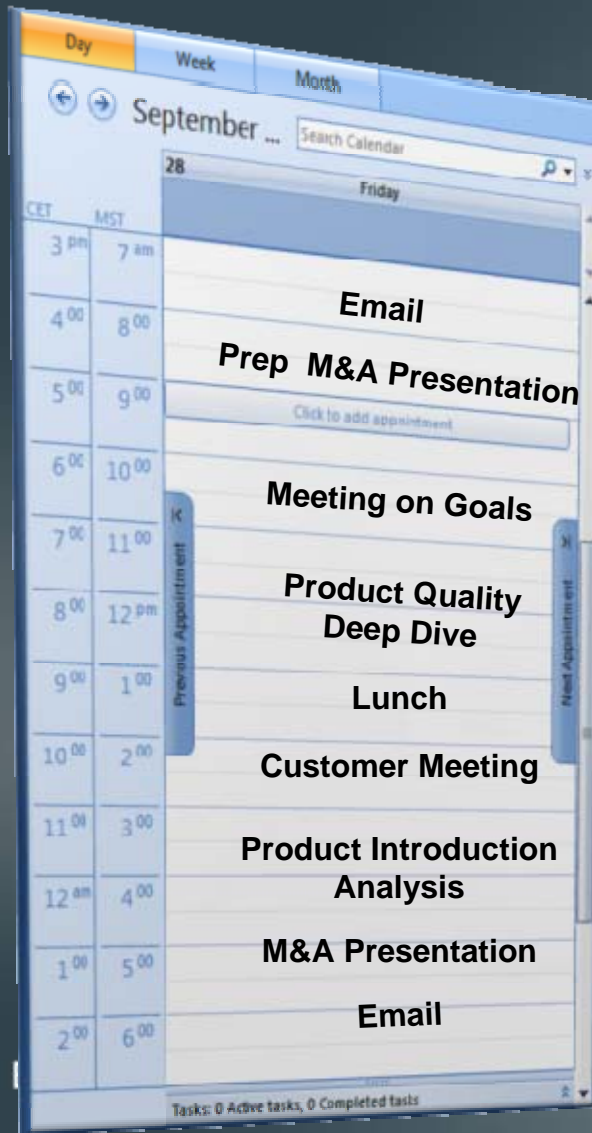

How do you get there?

Business Intelligence Summit 2007

Focus on Functionality: A Typical Information Worker's Day....

Microsoft

1. E-mail, meetings, conference calls, analysis
2. Work on proposals, approve some things, etc.
3. All reliant on some component of a BI system
 - ✓ Review of feedback from colleagues on proposals and ideas
 - ✓ Presentation preparation
 - ✓ Ad hoc analysis and “what-if’s”
 - ✓ Understand market trends and direction
 - ✓ Plan or adjust based on analysis
 - ✓ Make decisions based on the data and analysis at hand

There Are Key Capabilities Needed To Support This Spectrum

Microsoft

Personal BI

Team BI

Organizational BI

Spreadsheet Analysis

Data entry and report viewing

Publish and Share Information

Aggregate Plans and Forecasts

Synchronize and Align Goals and Tasks

Consolidate Results

Communicate our Status

Understand Variances and Take Corrective Action

What We Are Doing About It

Microsoft

Increasing our BI Investments

Extending our BI product line:
SQL Server and Office

Partnering more broadly and deeply

- Search, Content mgmt

Our End-to-End BI Offering

Microsoft

Performance Management

Microsoft

Performance Management software has the potential to transform how people drive business performance

Performance Management can give you the ability to

- Understand what is happening in the business
- Set a course for where you want to take the business
- Give you more confidence in your decisions

Performance Management

Microsoft

Performance Management Applications

Financial

- Budgeting, Planning and Forecasting, Consolidation, Management Reporting, Scorecards & Analytics

"I need to improve our analytics capabilities so we can understand our current business performance and do a better job of planning for the future."

Operational/Supply Chain/MFG

- Operational Dashboards, Supply Chain Analytics, Constraint Based Planning

"I need better visibility into my cost of operations so I can target specific cost reduction opportunities that won't have a negative impact."

Sales/Customer/Marketing

- Analytic CRM, Sales Forecasting, Campaign Management & Analytics, Sales Scorecards

"I need better visibility into our pipeline performance so I can focus on deals that help me grow business with my most profitable customers."

Human Resources

- HR Analytics, Headcount Planning, Talent Scorecards, OPEX Planning & Analytics

"I need better visibility into our talent management so I can plan for growth and understand issues before they become troublesome."

Performance Management

Microsoft

Better execute on strategy

The Role of Excel

Microsoft

Why Business Users Love Excel:

- Familiar
- Powerful
- Flexible
- Where people work

What PerformancePoint Server 2007 Brings:

- Excel with “live” and interactive data
- Processes and rules
- A central model
- Security
- Trust

Performance Management

Capabilities Delivered

Microsoft

Office PerformancePointServer 2007

Market Momentum

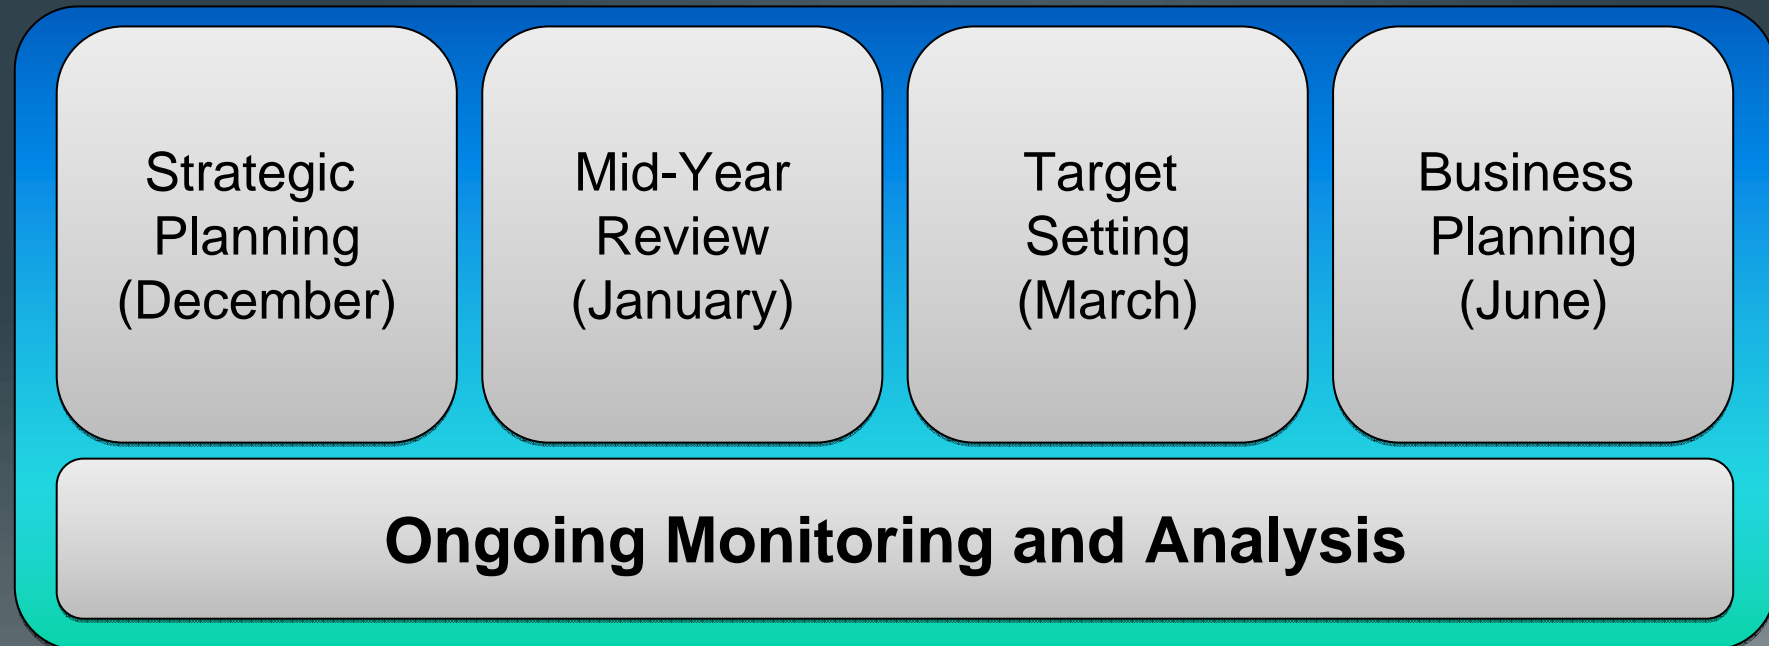

- 10,000+ Customers in CTP
- Almost 1,000 Partners Trained
- Enterprise Customers around the globe
- In use at Microsoft for 2+ years!

Performance Management at Microsoft:

An Internal Case Study

Microsoft's Performance Management Process

Microsoft

- Strategic plan with 3-5 year outlook, key investments
- Performance status at Mid-Year Review
- Target setting turns long range plans into annual goals
- Business planning turns annual goals into operational plans

Performance Management

Challenges In The Business Divisions (MBD)

- Multi-dimensional matrix
- Top down target, bottom up budget
- Disconnected processes and tools
- Inconsistent data definitions
- Overlapping accountability

Disconnected Data

A Tangled Web

Bruno Aziza
Senior Product Manager, Business Intelligence

What is Performance Management

Performance Management is defined by the processes, methodologies and technologies organizations use to monitor, analyze and plan business performance.

Performance Management

Better execute on strategy

PM Protagonists

Business Executives

CFO, CEO, COO.

Controller, Finance Executive.

General Manager, Line of Business Manager.

Information Workers

Power Users, Business Analysts, Modelers.

Contributors.

IT Managers

BIT

Corporate IT

Executives care about driving performance

Accelerate the decision making process.

Flexibility to handle **changing** business conditions.

Aligned, **accountable** and secure PM.

They can't accomplish this because

“6 months for planning,
5 months for budgeting,
2 weeks to develop a forecast”*

Information Workers want to contribute to performance

Need a **user-friendly** and flexible environment.

Collaborate as part of the performance management process.

Define, modify and maintain business rules without IT.

They can't accomplish this because

“Half their time
collecting and validating data
rather than
analyzing and planning”*.

IT Managers want to enable business users

Reduce the **complexity**, maintenance and cost of the performance management infrastructure.

Empower the business to improve performance.

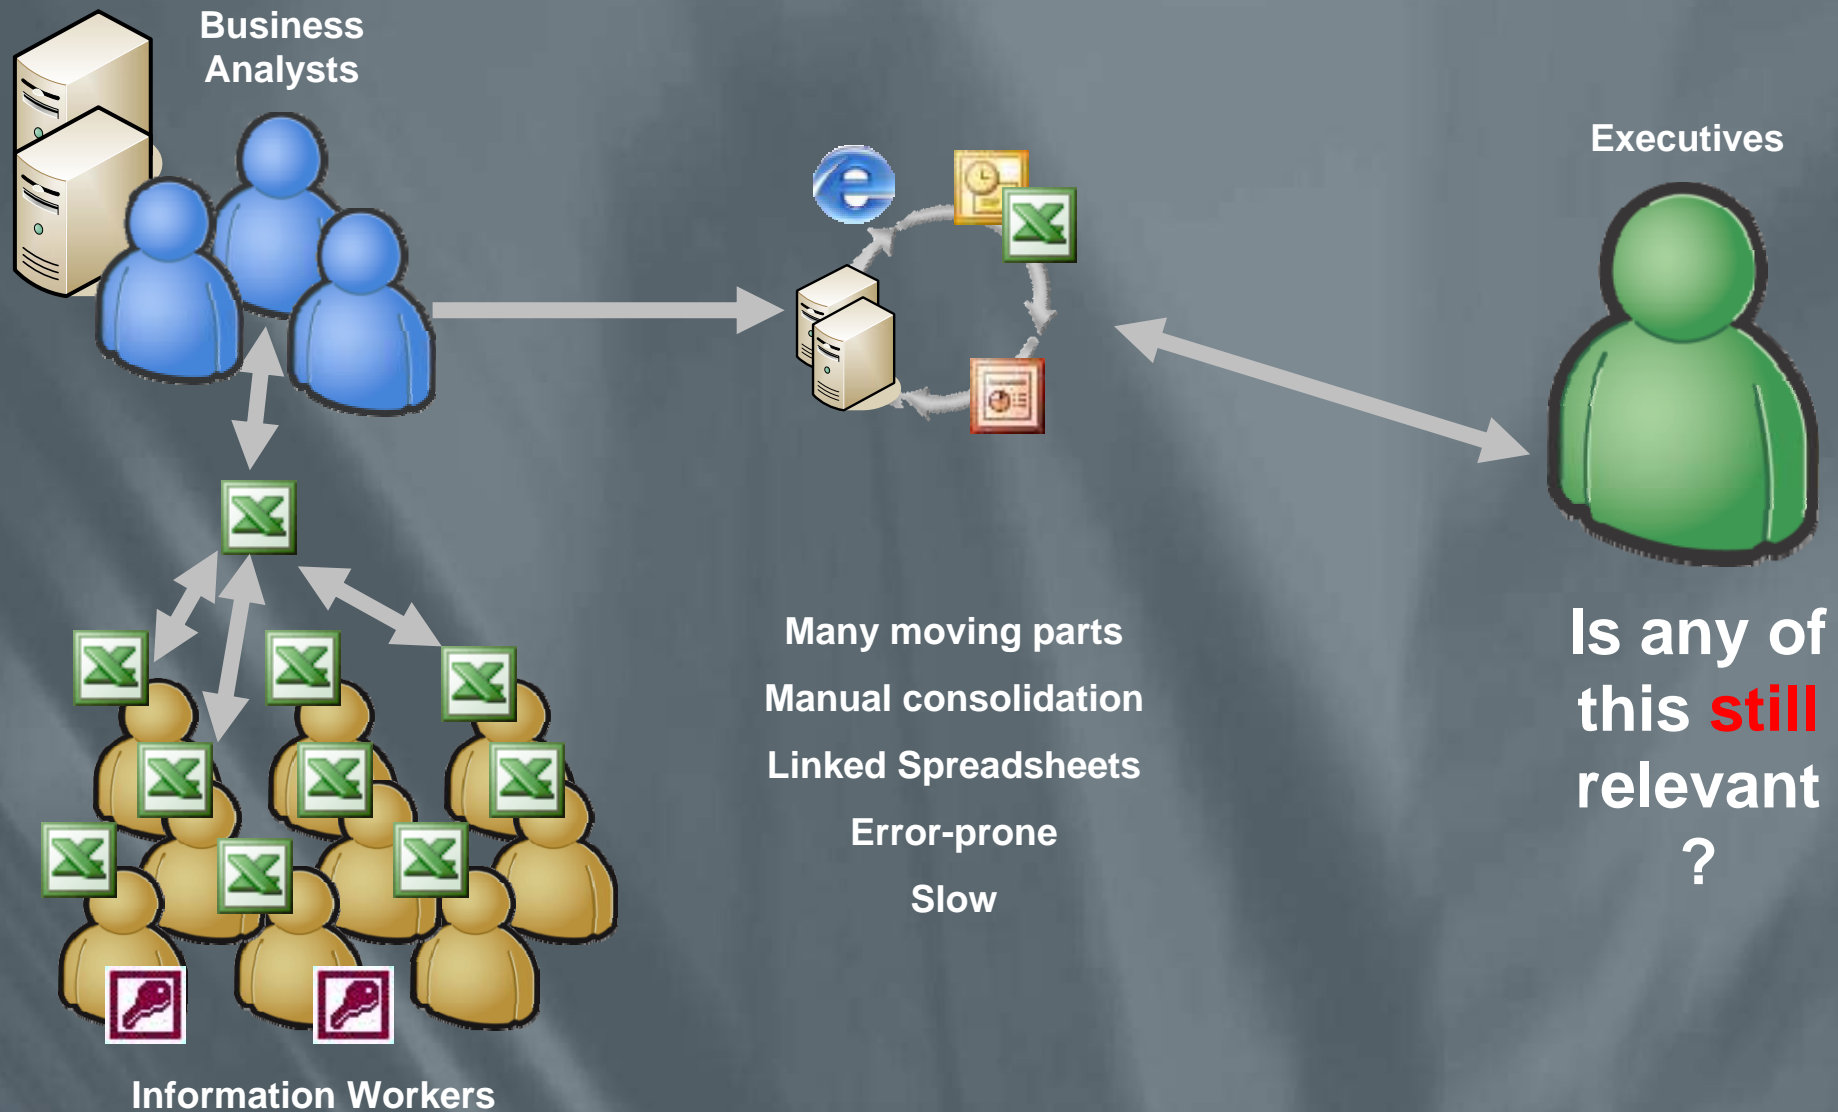

Provide access to information while supporting the **compliance** process.

They can't accomplish this because

“**10** general ledger systems,
12 different budgeting systems
13 different reporting systems”*.

How PM is addressed today

While the IT managers ask

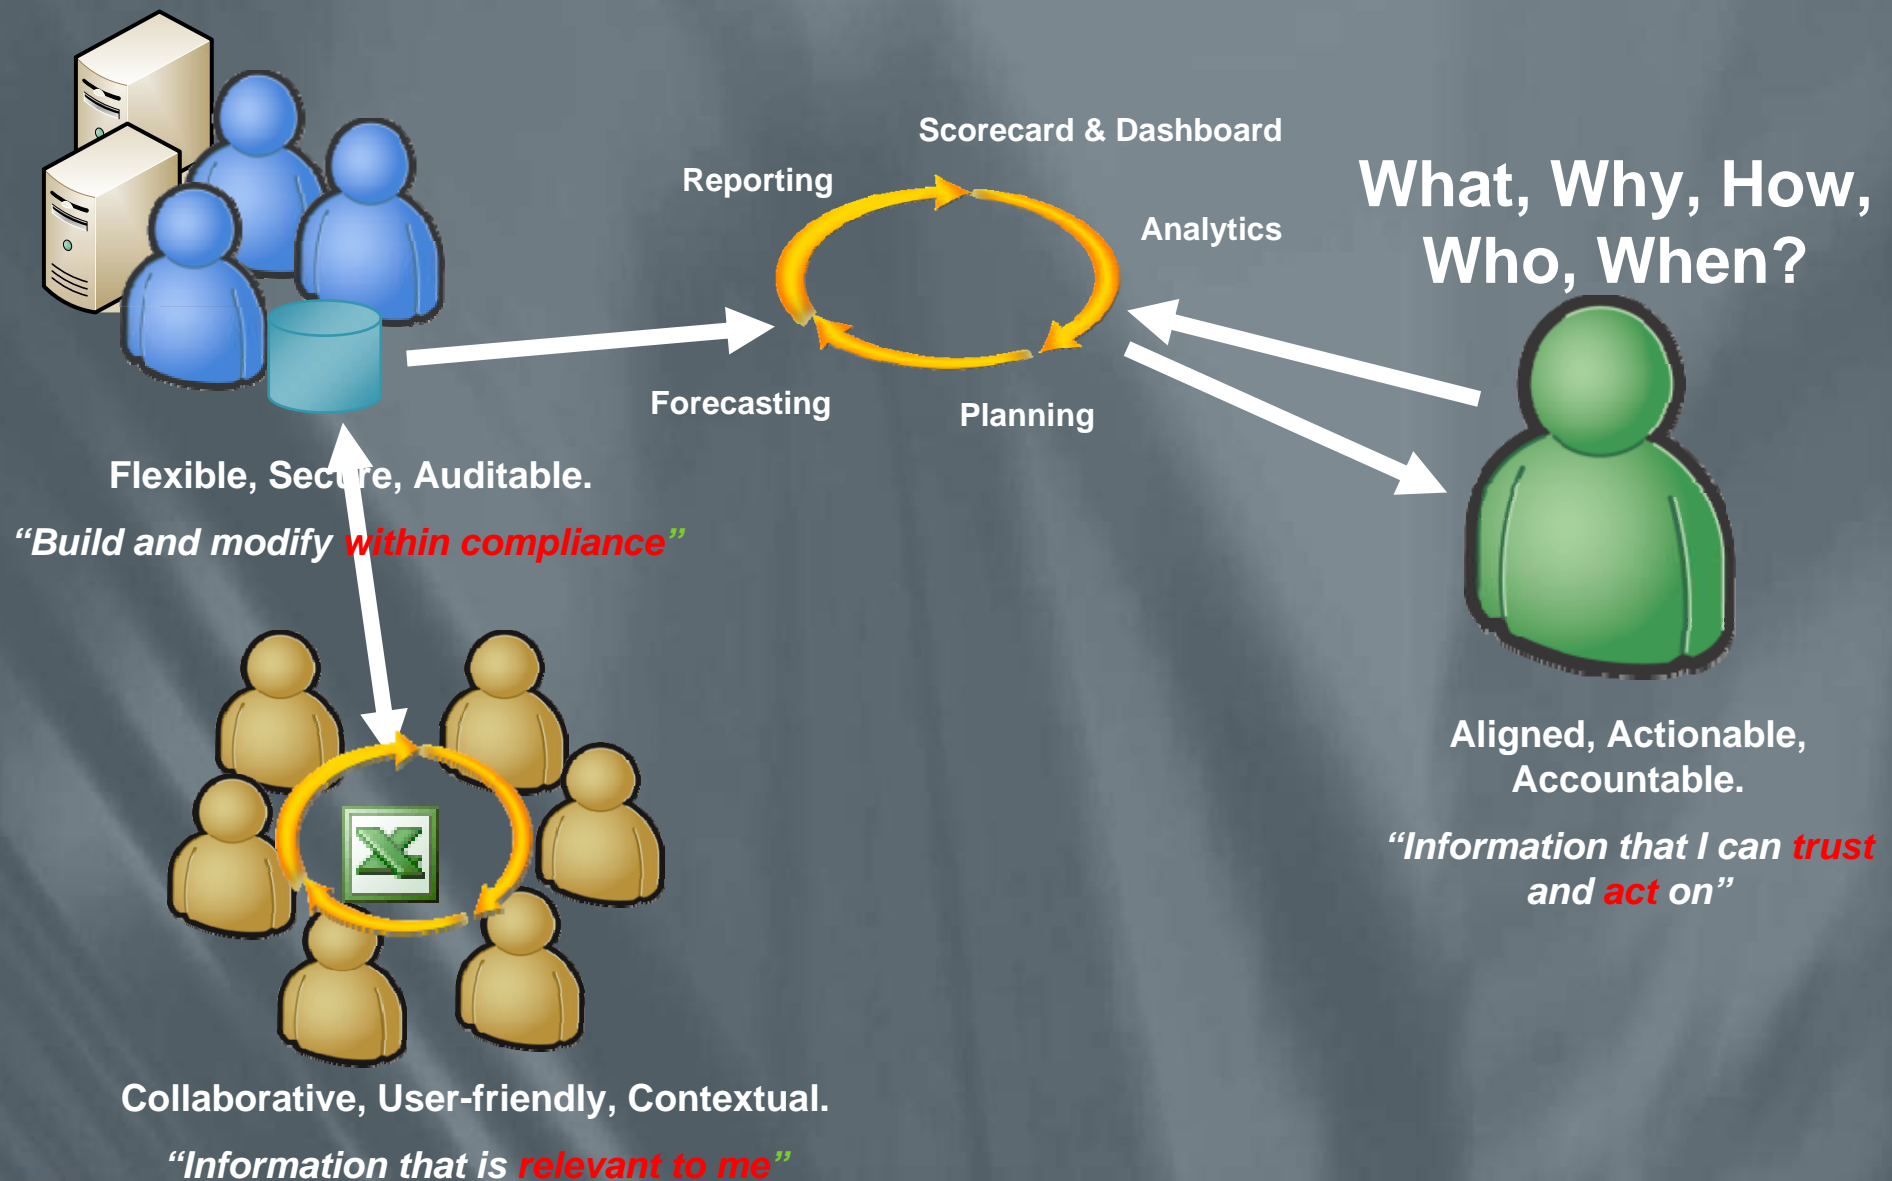

Information?

ES".

How PM can be addressed

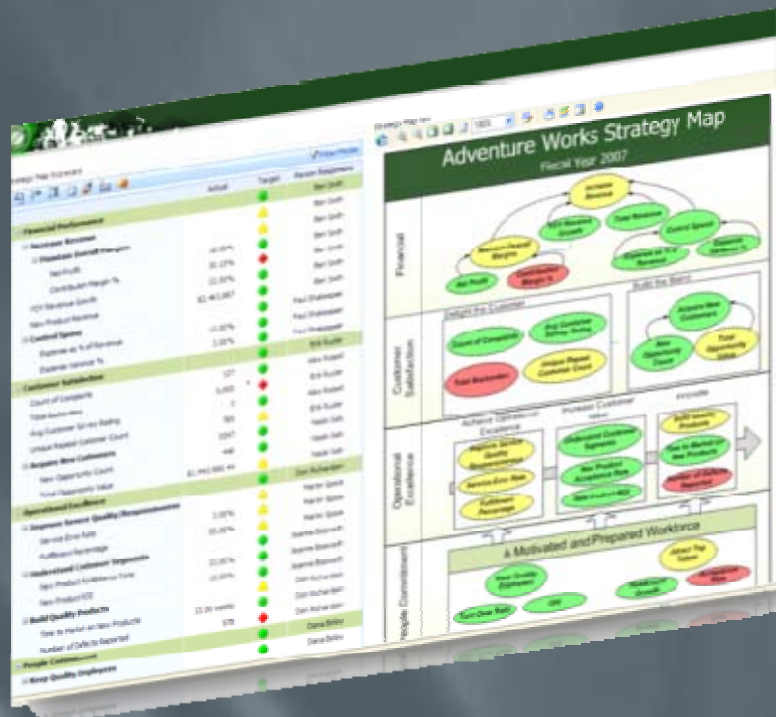

Performance Management

Capabilities required

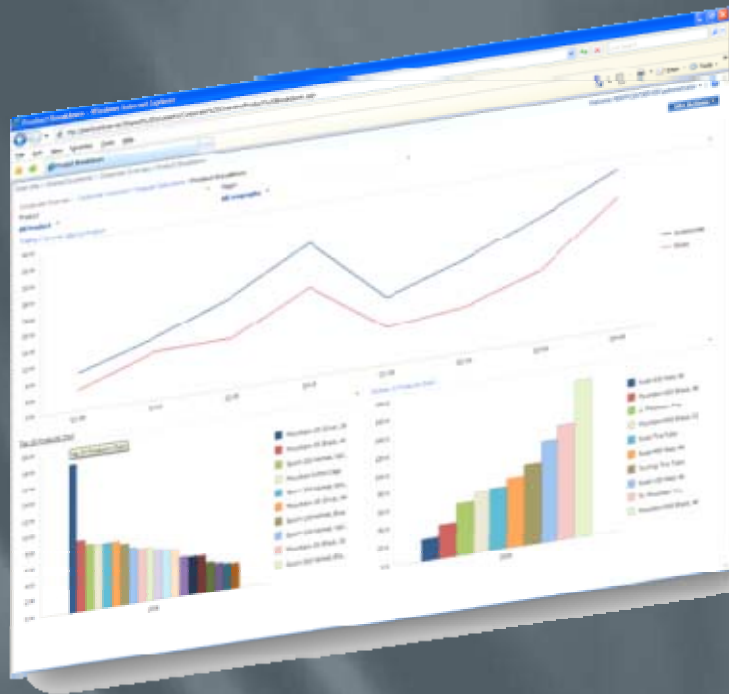

Rich Monitoring Capabilities

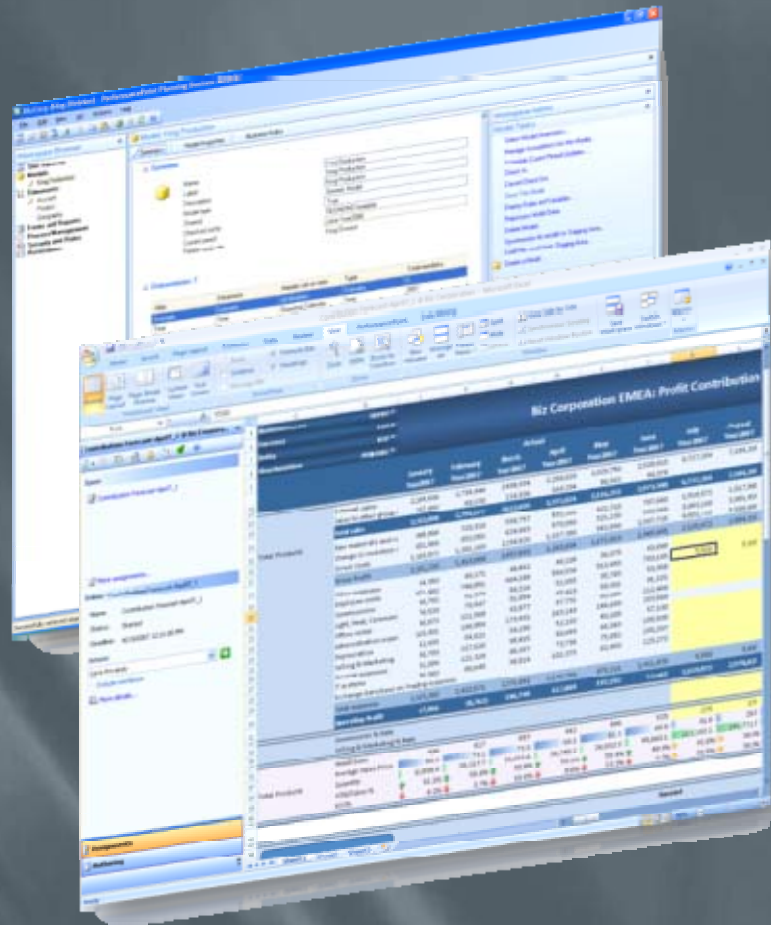

- Spans from personal **performance dashboards** to formal methodology-based and **cascading scorecards**
- Access wide range of **structured** and **unstructured** data-sources for more comprehensive dashboards and scorecards
- Rich dashboard **filters** to dynamically filter all views on the dashboard.
- **Contextual KPIs** and

Analysis And Data Visualization

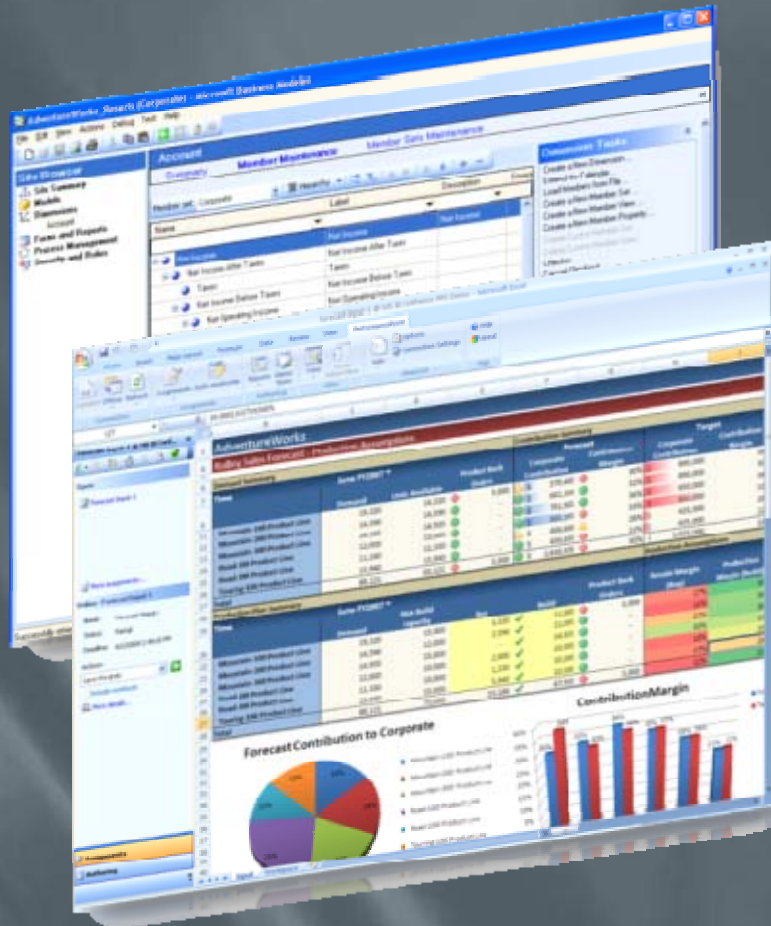

- **Web-based thin analysis** provides users with rich analytical functionality out of the box, minimizing help required from IT Staff
- Analytics include multidimensional **slice and dice, drill-across, drill-to-detail, root-cause analysis, and centralized business logic** definitions
- **Predictive analytics** allow for forecasting and trend analysis
- **Guided and contextual analysis** through tight

Planning And Modeling

- Business users design models the way they think about their business
- **Top-down** and **bottom-up** planning functionality connecting people and driving accountability
- **Process management** to manage forms, workflows, submissions, approvals, reports, notifications and annotations
- **Secure** and **auditable** environment
- Spans from single model deployments to enterprise scenarios

Reporting And Consolidation

- Construct models that **drive profitability analysis** incorporating standard financial functionality
- Support management and GAAP consolidation process with **multiple currency conversions, inter-company eliminations and reconciliations, multi-tier allocations**
- Dynamic and standard reports including **financial and business performance reports**
- Publish live reports from Excel to Reporting Services and Microsoft Office Server providing **consistency of experience** for report consumers

Analyst quotes

The OLAP Report

Nigel
Pendse

There is now no doubt that Microsoft is **deadly serious about taking a very big bite** out of the performance management market.

PerformancePoint has a scalable architecture, designed with considerable attention to performance, and early customer reports are positive. Indeed, PerformancePoint is reported already to **outperform some of the established market-leading products**.

(OLAP Report, June 27, 2007)

Download preview [here](#)

AMR Research

 AMR Research

It's the **total Microsoft** solution, not just the BI/PM products... While some competitors will dismiss Microsoft products as not scalable or lacking functionality, **that assessment is short-sighted.**

(Market Outlook: Microsoft's Looming Impact on the Business Intelligence and Performance Management Market

June 27, 2007

By John Hagerty)

customers

Energizer

Integrated Performance Management Solution enables leading manufacturer to move towards leaner and more efficient annual business planning

Customer Business Challenge

- Lack of comprehensive performance management solution for European region to provide more effective business planning and forecasting abilities
- Disparate systems cause difficulties in consolidating budget and forecast data at the region level

Solution

- Secure and integrated solution to streamline the business planning process, improve the quality and consistency of data, and enable in-depth and flexible analyses
- Built on Microsoft Office PerformancePoint Server 2007 and Microsoft Office 2007

Customer Results/Benefits

- Familiar interface that enables hundreds of “difference makers” to improve the thousands of decisions that directly impact the business
- Ability to analyze and forecast a complex business drivers mix across organization, product and customer at any level that was not previously possible

Skanska USA Building

Easy to use interface helps construction giant build better planning and forecasting, improves reporting and streamlines consolidation of information

Customer Business Challenge

- A high dependency on accurate forecasting, analysis and project costs to ensure profitability was challenged by delays from cumbersome processes and high data volumes
- Delays in report creation stalled the discovery of issues, making decisions and taking action

Solution

- Easy-to-use, integrated and secure performance management solution that empowers more employees across the organization to manage the company's profitability
- Built on Microsoft Office 2007 and Microsoft Office PerformancePoint Server 2007

Customer Results/Benefits

- Enhanced data usability and improved timeliness and accuracy of the forecasting, planning and budgeting process
- Quick, easy access to accurate and consistent data provides the ability to create a wide variety of reports that enable flexible, in-depth analysis and closer monitoring of the bottom line

Oticon A/S

Complete Performance Management Solution improves key functions and processes for leading global manufacturer and seller of hearing aids

Customer Business Challenge

- Manual processes and inconsistent and inaccurate data created extra work for employees
- Lack of integration drove a need to improve several key financial processes such as financial consolidation, budgeting, forecasting, and reporting

Solution

- A PM framework to create a seamless architecture that would integrate key aspects of finance and business and drive better business performance
- Built on Microsoft Office 2007 and Microsoft Office PerformancePoint Server 2007

Customer Results/Benefits

- Automatic consolidation of financial results from all companies while allowing users at local and enterprise levels to continue work in Excel
- Ability to move towards complete integration of processes and systems and to fully automate the data life cycle of BI intelligence solutions

BUSINESS INTELLIGENCE SUMMIT 2007

Microsoft

Business Intelligence Summit 2007

ROYAL
CHILDREN'S
HOSPITAL

Microsoft®

Royal Children's Hospital Melbourne

Business Intelligence Case Study

Tony Stratford
Project Officer

Business Intelligence Summit 2007

Royal Children's Hospital

- Specialist paediatric teaching hospital
- 250 beds
- 32,000 inpatients per year
- 250,000 outpatients per year
- 3,400 staff

Hospital Management Priorities

Clinical quality and safety

- Unplanned patient returns
- Infections
- Medication errors
- Minimize treatment delay

Demand management

- Elective Surgery
- Emergency
- Outpatient clinics

Resource efficiency

- Minimizing hospital stay
- Reducing cancellations
- Maximizing throughput

Performance management

- Clinical
- Financial
- Workforce

Change management program

- \$850M new facility planned for 2011
- Building Our Future program
 - Setting a vision and strategic direction
 - New operating models
 - Clinical and business process redesign
 - Leadership, people and culture
 - Facility redesign
- Performance management program

Performance Management System

Old reporting system – the issues

- Lots of data, not much information
- Multiple reporting sources
- Unstructured, uncoordinated reporting
- Not addressing the needs of all users
- Limited functionality - inquiry based / static pdf
- Access and interrogation was complex
- Time consuming and resource intensive
- Separate security structure

Objectives for new system

- Facilitate performance management framework
- Improve decision making
- Consolidated and consistent reporting
- Visible department impact
- Enable drill down to supporting reports/data
- Improve reporting content, functionality and timeliness
- Improve user interaction
- Reduce work load

Selection criteria

Software requirements (24 assessment criteria)

- User friendly
- Scorecard functionality with drill down capability
- Quality reporting tools
- Cost effective
- Maintainable in house
- Security
- Integration with other user tools (MS Office)
- Data analysis capability

Selection criteria

Implementation partner

- Expert knowledge
- Relevant experience
- Reference sites
- Structured implementation program
- Understanding of our needs
- Understandable proposal
- Outcome focused

Selection process

- 13 responses to RFT
- Evaluated 6 products
 - Sample dataset and reports
- Proof of concept (2 products)
- Presented POC to 40 hospital managers
 - Microsoft best evaluation score
 - 87% selected Microsoft as preferred product

Chosen Solution

- Strategic Data Management
- SQL Server 2005 Enterprise
 - Integration Services
 - Database Services
 - Reporting Services
- Business Scorecard Manager 2005
- Windows SharePoint Services 2.0

Implementation

- 4 month timeframe
 - Design and configure Data Warehouse
 - Define KPI dimensions and measures
 - Develop Scorecard framework
 - Develop targets, thresholds, trends
 - Design and develop reports
 - Testing and refinement
 - Provide user training (250+ users)

Impacts and Benefits

- High user acceptance
 - Familiarity with Windows, MS Office, Active Directory
- Data integration
 - 8 systems currently populate warehouse
- Reporting
 - Significantly enhanced functionality and currency
- Analysis
 - KPIs linked to supporting reports and underlying data

Impacts and Benefits

- Scorecard
 - Every department represented in scorecard
 - Performance issues easily identified and tracked
- Management
 - Consistent information
 - Focused management attention on what is important
 - Complete transparency in performance results
 - Significant improvement in regulatory reporting

Looking ahead

- Departmental scorecards
 - 90 departments
 - Additional KPIs and reports
- Expansion of data warehouse
 - Risk management
 - Infection Control
 - Intensive Care
- Integration with business planning and budgeting process
- Data mining
- Notification services
