

certificate no. P192

## UK IT SECURITY EVALUATION AND CERTIFICATION SCHEME

This is to certify that

Check Point VPN-1/FireWall-1 Next Generation (NG)  
Feature Pack 2 (FP2)

running on Nokia IPSO Operating System  
on specified Nokia platforms

has been evaluated under the terms of the Scheme  
and complies with the requirements for:

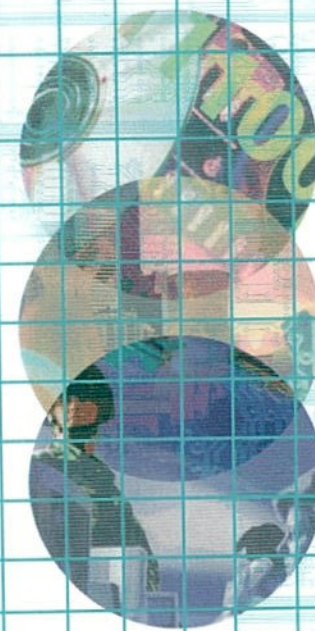

### E3 ASSURANCE LEVEL

Certification is not a guarantee of freedom from security vulnerabilities.  
This certificate reflects the Certification Body's view at the time of certification.  
It is the responsibility of users (both prospective and existing) to check whether any  
security vulnerabilities have been discovered since the date shown on this certificate.
