

Kruder & Dorfmeister™ –

**Soundtrack composers for
the Nokia 8800 Arte and
Nokia 8800 Sapphire Arte**

The unique soundtrack of the Nokia 8800 Arte and Nokia 8800 Sapphire Arte is composed by internationally acclaimed producers Kruder & Dorfmeister™. The Austrian masters – known for their stellar remixes and DJ sets – created a musical kaleidoscope of graphic grooves by joining forces with renowned visual artist Fritz Fitzke. The outcome is a stunning soundtrack and videotrack, exclusively available on the Nokia 8800 Arte and Nokia 8800 Sapphire Arte.

Their versatility has earned Kruder & Dorfmeister™ a world wide reputation for having created some of the finest electronic music to date.

This musical journey - driven by forward sound and vision - ranges from slow and soulful beats to top-of-scale tempo grooves. "The approach was to dive into a sonic world of abstract sequences and organic sound sculptures," say Kruder & Dorfmeister™.

"For the soundtrack of the Nokia 8800 Arte we have envisioned a different atmosphere - creating music which is elegant, unique and mature, ensuring it sounds different than any other phone!"

Richard Dorfmeister adds: "As producers, we have sonic hearts with strong convictions to be perfectionists with an unshakable belief in releasing only the best. Similar to carving a gemstone or creating a beautiful piece of jewelry – our music is 'matter' nurtured into existence but still remaining in perfect harmony with the nature it has evolved from. Craftsmanship, if you so wish."

"One wants to create something that is fresh but has longevity and duration," Peter Kruder acknowledges.

The outcome is an innovative, stylish and sophisticated masterpiece that seamlessly blends with all other qualities the Nokia 8800 Arte and Nokia 8800 Sapphire Arte possess. "Our musical quest has taken us to many audiences and locations but composing a soundtrack for a mobile device intrigued us immediately," Peter Kruder says. "As a composer and DJ you constantly communicate with people. Distilling this into a private soundtrack for a handset makes it even more powerful as you become a part of people's life."
