All mechanical plastic parts have been marked where practically possible². Plastic parts are marked in accordance with ISO 11469 and ISO 1043-1 to -4 standards.

Product has been marked according to WEEE directive requirement for recycling. Do not dispose of your product as unsorted municipal waste.

Product contains a built-in Lithium Polymer battery.

² Dependant on size, location and materials of the part

All information in this eco-declaration is based on scientific analysis and/or data provided by suppliers. There may be some variance in the information.

INSTRUCTIONS FOR THE USER

- Always unplug the charger from the wall socket after the phone is fully charged. This avoids unnecessary power consumption of the charger in standby and saves energy.
- Electronic devices shall not be thrown into household waste but be separated for correct recycling.
- For environmentally sound recycling, contact your local Nokia service point or check local regulations for correct disposal of household electronics.
- Batteries are collected separately for battery recycling. Do not throw used batteries into household waste.
- Please separate the packaging material according to responsible waste disposal options and sorting for recycling.
- See the **Recycling Map** on <http://www.nokia.com/environment> to find the nearest collection point for used mobile phones and accessories.
