Eco innovation

Eco innovation is about making things better, imagining possible solutions for impossible challenges. It's about making mobile devices that reduce our impact on the environment: using sustainable and ethically sourced materials, improving energy efficiency, creating products made from renewable or recycled materials or phones that are themselves recyclable. It's about inventing software and services that help us live in a way that's kinder to the planet. Eco innovation is for everyone. We at Nokia work hard to create better solutions for tomorrow. By innovating them together we can achieve much more.

Recycling

Always return your used electronic products, batteries, and packaging materials to a dedicated collection point. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. More detailed information is available from the product retailer, local waste authorities, national producer responsibility organisations, or your local Nokia representative.

Check how to recycle your Nokia products at www.nokia.com/werecycle, or if browsing on a mobile device, nokia.mobi/werecycle.

- All mechanical plastic parts have been marked where practically possible². Plastic parts are marked in accordance with ISO 11469 and ISO 1043-1 to -4 standards.
- This product has been marked according to WEEE directive requirement for recycling.
- Do not dispose of your product as unsorted municipal waste.
- The Nokia Home Music does not contain a battery. The Remote Control is powered by AAA batteries.
- Electronic devices and batteries shall not be thrown into household waste but be separated for correct recycling.
- Please separate the packaging material according to responsible waste disposal options and sorting for recycling.

² Dependent on size, location and materials of the part.
