

ECO-DECLARATION FOR NOKIA 2310

Product type: Mobile Device

Weight: 85 g

Size: Height 105.4 mm x Width 43.9 mm x Length 19.05 mm, 69 cc (cm³)

Materials

The product does not contain¹:

- Azo colorants
- Asbestos
- Benzene
- Beryllium Oxide
- Chlorofluorocarbons CFCs/HCFCs/Halons as banned in the Montreal Protocol
- Polychlorinated Biphenyls (PCB) or Polychlorinated Terphenyls (PCT)
- Short Chained Chlorinated Paraffins
- Endangered species of flora and fauna

This product complies with the China legislation “Management Methods on the Prevention and Control of Pollution caused by Electronic Information Products” commonly known as “China RoHS”.

The product does not contain the following substances in accordance to the EU RoHS Directive 2002/95/EC:

- Cadmium
- Chromium VI
- Lead (in mechanical plastic parts, solder or components)

¹ In levels more than 100 PPM by weight in the product

All information in this eco-declaration is based on scientific analysis and/or data provided by suppliers. There may be some variance in the information.

- Mercury
- Polybrominated Biphenyls (PBB) or Polybrominated Diphenyl Ethers (PBDE) in Printed Wiring Boards, mechanical parts and components

Further material information

This product is manufactured using Lead-free solder paste.

The surface parts of this device may contain a small amount of nickel. Persons who are sensitized to nickel may have symptoms from prolonged skin contact with these parts.

Energy consumption

The power consumption² of the product with the standard battery BL-5C in average is listed below:

Call: 880 mW

Idle mode: 9.5 mW

Charging time in idle mode with the AC-2 charger: 2h 20 min

The energy consumption is measured in conditions described in the ECTEL/TMS standard, which is aiming to provide an agreed and common means for quoting battery life and current consumption figures for GSM Mobile Stations. See Features for talk and standby time figures at www.nokia.com/phones. For more information on the energy consumption please see also the Eco-declaration for the charger at www.nokia.com/environment.

²GSM 1800MHz network

All information in this eco-declaration is based on scientific analysis and/or data provided by suppliers. There may be some variance in the information.

Recycling and disassembly

All mechanical plastic parts have been marked in accordance with ISO 11469 and ISO 1043-1 to 4, where practically possible³.

Product has been marked according to WEEE directive requirement for recycling. Do not dispose your product as unsorted to municipal waste.

The covers of the product have been designed for easy disassembly at the end of the product's life cycle.

The battery can easily be removed from the product without tools if necessary.

Gluing of different materials has been avoided.

All the screws in the product can be opened by one tool.

INSTRUCTIONS FOR THE USER

- Always disconnect the charger when not in use.
- Please do not throw electronic devices into household waste but separate them for correct recycling.
- For environmentally sound recycling; contact your local Nokia service point or check local regulations for correct disposal of household electronics.
- Batteries are collected separately for battery recycling. Do not throw used batteries into household waste.
- Please separate the packaging material according to responsible waste disposal options and sorting for recycling.
- See the [Recycling Map](#) on our web pages to find the nearest collection point for used mobile phones and accessories.

³ Dependant on size, location and materials of the part

All information in this eco-declaration is based on scientific analysis and/or data provided by suppliers. There may be some variance in the information.
