

ECO-DECLARATION FOR NOKIA N93

Product type: Mobile Device

Weight: 180 g

Size: Height 118.2 mm x Width 55.5 mm x Length 28.2 mm, 133 cc (cm3)

Materials

The product does not contain¹:

- Aliphatic CHCs
- Arsenic and compounds
- Asbestos
- Azo colorants
- Benzene
- Beryllium Oxide
- Beryllium and compounds
- Chlorofluorocarbons CFCs/HCFCs/Halons as banned in the Montreal Protocol
- Polychlorinated Biphenyls (PCB) or Polychlorinated Terphenyls (PCT)
- Nonyl Phenols and Nonylphenol Ethoxylates
- Short Chained Chlorinated Paraffins
- Endangered species of flora and fauna

The product does not contain the following substances in accordance to the EU RoHS Directive 2002/95/EC:

- Cadmium
- Chromium VI
- Lead (in mechanical plastic parts, solder or components)
- Mercury
- Polybrominated Biphenyls (PBB) or Polybrominated Diphenyl Ethers (PBDE) in Printed Wiring Boards, mechanical parts and components

¹ In levels more than 100 PPM by weight in the product

All information in this eco-declaration is based on scientific analysis and/or data provided by suppliers. There may be some variance in the information.

Further material information

This product is manufactured using Lead-free solder paste.

Antimony trioxide, Brominated and Chlorinated flame retardants are not added in main printed wiring board material and covers.

The surface parts of this device may contain a small amount of nickel. Persons who are sensitized to nickel may have symptoms from prolonged skin contact with these parts.

Polyvinylchloride (PVC) is not used in this product or product sales package.

NOTE. Cable material is Polyvinylchloride (PVC)-free.

Energy consumption

The power consumption² of the product with the standard battery BP-6M in average is listed below:

Call: 870.00 mW

Idle mode: 19.00 mW

Charging time in idle mode with the AC-4 charger: 1 h 45 min

The energy consumption is measured in conditions described in the ECTEL/TMS standard, which is aiming to provide an agreed and common means for quoting battery life and current consumption figures for GSM Mobile Stations. See Features for talk and standby time figures at www.nokia.com/phones. For more information on the energy consumption please see also the Eco-declaration for the charger at www.nokia.com/environment.

²GSM 1800MHz network

Recycling and disassembly

All mechanical plastic parts have been marked in accordance with ISO 11469 and ISO 1043-1 to 4, where practically possible³.

Product has been marked according to WEEE directive requirement for recycling. Do not dispose your product as unsorted to municipal waste.

The covers of the product have been designed for easy disassembly at the end of the product's life cycle.

The battery can easily be removed from the product without tools if necessary.

All the screws in the product can be opened by one tool.

INSTRUCTIONS FOR THE USER

- Always disconnect the charger when not in use.
- Please do not throw electronic devices into household waste but separate them for correct recycling.
- For environmentally sound recycling; contact your local Nokia service point or check local regulations for correct disposal of household electronics.
- Batteries are collected separately for battery recycling. Do not throw used batteries into household waste.
- Please separate the packaging material according to responsible waste disposal options and sorting for recycling.
- See the [Recycling Map](#) on our web pages to find the nearest collection point for used mobile phones and accessories.

³ Dependant on size, location and materials of the part
