

User Guide for downloading the latest system software to Nokia Mediamaster 9200 S

1 INTRODUCTION

This document describes how to download the latest system software to your Nokia Mediamaster.

2 ENVIRONMENT

A null-modem serial cable connected to your host computer.

3 BEFORE YOU START

- Connect the null-modem serial cable from PC to your Nokia Mediamaster.

4 SETTINGS

- Save the Update file into a new directory/folder of your PC.
- Unzip the Update file
- Install the Download Program (sdl.exe) by running Setup.
- Follow the instructions on the screen.

5 NOTE

- You might have to erase the channel list in your receiver due to different memory allocations in the new software. Go into menu and run automatic installation. This will erase your channel list and run you through a new channel search.
