# Make the grade by securing a college campus network ...

## Enabling connectivity

The Internet is transforming education networks into a source of competitive advantage by increasing access, heightening productivity and enabling new forms of instruction.

## Ensuring security

As local and remote access increases, higher education institutions face tough, expensive challenges in keeping intruders out.

## Reducing costs

With special pricing discounts for higher education institutions, Nokia IP Security Platforms make the grade and are easy on the budget. Ask your Nokia representative for details

## Delivering more than just a competitive sticker price
