

Quick Guide to Using the Nokia 6210 with Lotus cc:Mail 8.2

1. Installation and setting up

Install the client as instructed in the Lotus cc:Mail 8.2 (later called cc:Mail in this document) User Guide. You must also have the correct settings for your post office, etc., available when installing the client. Before using the Nokia products you have to copy a script file to the location where all other *.MDM files are stored. (for example *C:\LOTUS\CCMAIL\MDM*).

The Nokia files can be downloaded from our support web pages which can be found at <http://www.forum.nokia.com>

When the files are copied to the correct location, the cc:Mail has to be configured from Actions -> Locations... (Figure 1).

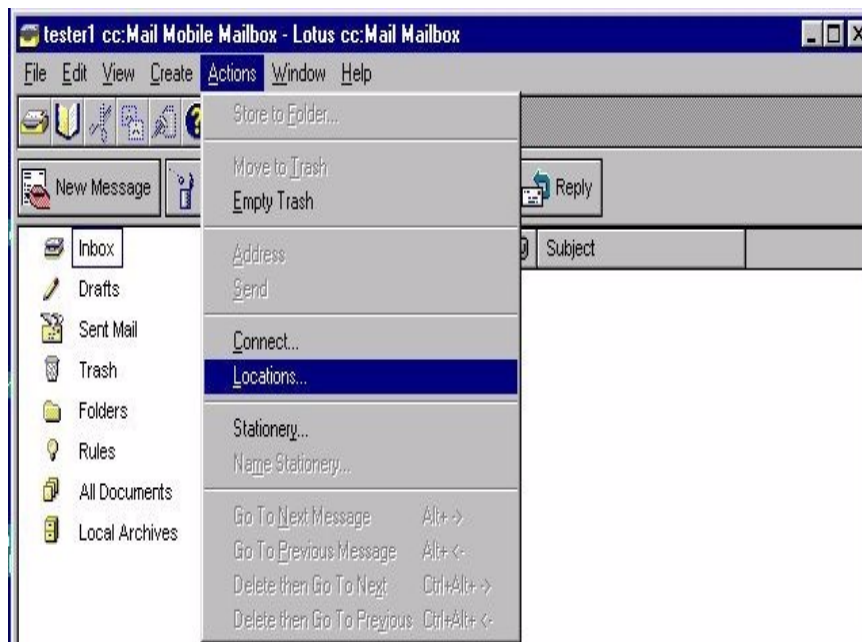

Figure 1. Starting setup ..

Then choose one of the locations and choose Edit.. When Edit is selected the main window of the location is opened. Choose the Connections tab (Figure 2).

Figure 2. Making a new connection.

By choosing *New..* it is possible to choose the communications method and other communication settings. Firstly, the correct modem must be chosen from the modem list for the Nokia CardPhone (Figure 3) as the active modem.

Figure 3. Choosing the right modem ... Scroll the list to find Nokia 6210.

Then choose the port settings and change them to their correct status; it is only necessary to change port and speed settings (Figure 4). *NOTE: To find out which port the Nokia 6210 is using, open the Win95/98 Modems (Start ->Settings ->Control Panel ->Modems) and look at the Modem entries and select Nokia 6210 and properties and check the COM port. Specify the port in your communication application. NOTE! If the Nokia 6210 is using COM port 5 or above please try to change the COM port to 4 or lower (this may be the case if you wish to use IrDA).*

Figure 4. Port settings...

When the port and modem settings are changed accept all by clicking OK. It is shown as the named connection (Figure 5).

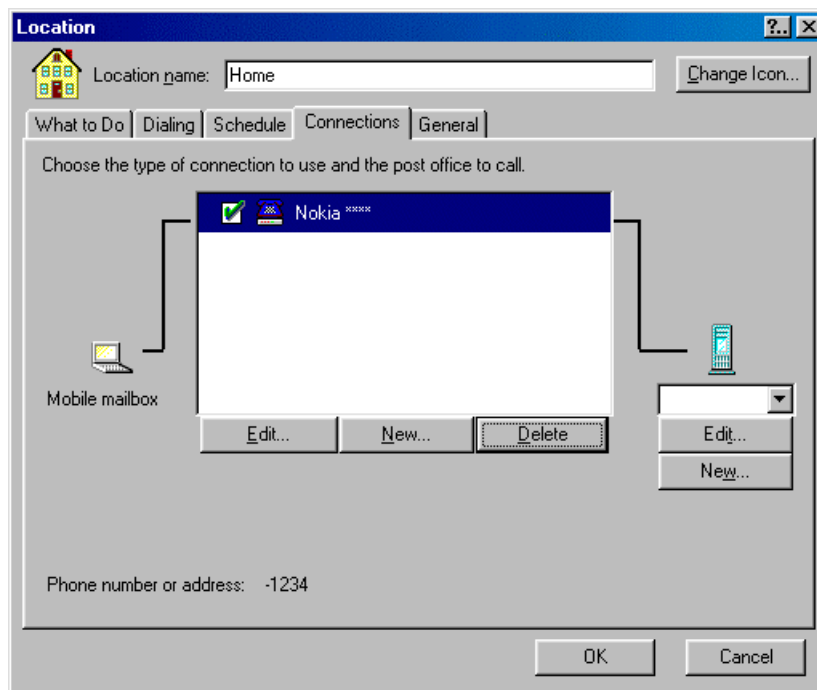

Figure 5. Accepting the connections.

You also have to edit the post office settings. This can be done by choosing Edit.... (under the server icon) (Figure 6). Select New.. and the post office settings can then be added.

Figure 6. Editing the post office settings.

By choosing Add/Remove Addresses.... The post office settings can be set through New.. (Figure 7).

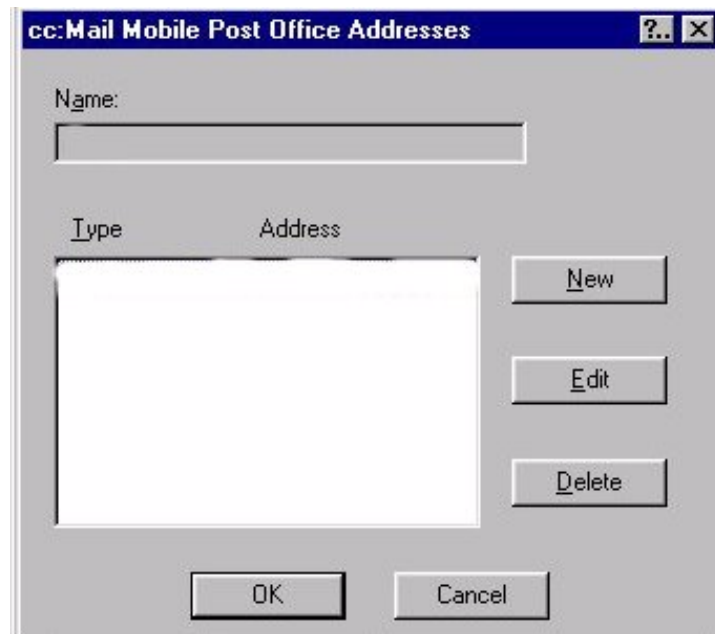

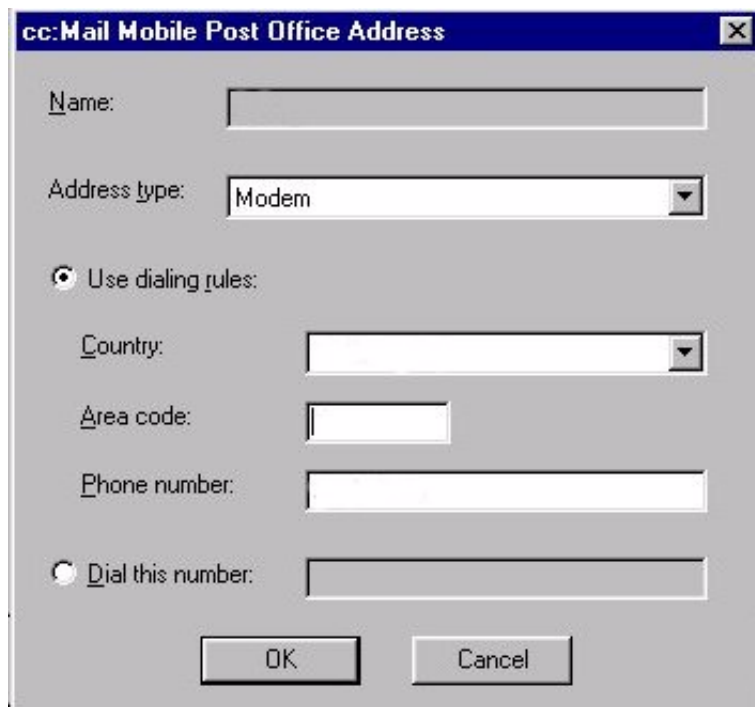

Figure 7. Post office addresses.

Add the relevant country code (choose the correct country from the list), add the area code (without the first zero), followed by the phone number without the area and country codes. After this, accept with the OK button (Figure 8).

The dialog box is titled "cc:Mail Mobile Post Office Address". It contains the following fields and controls:

- Name:** A text input field.
- Address type:** A dropdown menu with "Modem" selected.
- Use dialing rules:** A radio button that is selected.
- Country:** A dropdown menu.
- Area code:** A text input field.
- Phone number:** A text input field.
- Dial this number:** A radio button that is not selected, followed by a text input field.
- Buttons:** "OK" and "Cancel" buttons at the bottom.

1.1 Sending / Making a connection

Connection to the post office can be made by clicking *Actions* -> *Connect...* The connection is confirmed by clicking OK and after that the client will start to call the phone number which was defined earlier (Figure 9).

The dialog box is titled "Connection Confirmation". It contains the following elements:

- Text:** "Confirm your connection options, and click OK to connect."
- Home / Mobile location:** A dropdown menu with "Home" selected, accompanied by a house icon.
- Post office:** A dropdown menu with an empty field, accompanied by a mobile phone icon.
- Checkboxes:**
 - ☒ Send Outbox messages
 - ☒ Receive new messages
 - ☐ Synchronize LAN and Mobile Mailboxes
 - ☐ Update Mobile Address Books
 - ☐ Filter incoming mail
- Buttons:** "Set Filters...", "OK", and "Cancel".

Figure 9. Connection confirmation.

1.2 Troubleshooting

Make sure that there are NO PARENTHESES in the phone number (NO SEPARATE AREA CODE AND PHONE NUMBER => SET ALL NUMBERS IN THE PHONE NUMBER FIELD)
