2.1 CALENDAR

After PC software selection, the PC Suite for Nokia 9210i Communicator analyses the PC software you have selected. This takes a few seconds. The following window will then appear.

In the summary field you can see all the default details for this task. You can modify these settings by pressing the **Change** button or accept them by pressing the **Next** button.

When you are modifying these settings you see the following screens.

On the first sheet you can define what kind of data you will synchronize. Also, you can define the date range that you will synchronize.

On the second sheet, you can define what will happen if there is a conflict between the PC and Nokia 9210i Communicator calendar data. You can also select the direction of the synchronization.

The third sheet contains the privacy settings.

The last sheet contains all the PC software specific settings. The layout of the sheet depends on which PC software you have selected. The figures below illustrate the Lotus Notes and the Microsoft Outlook sheets. Here you can specify the calendar location in the PC software, the profile settings and password, if it is required.

When the settings are correct in all the sheets, press the **OK** button to return to the previous screen and press the **Next** button to continue.

Now you can give a name to the task you just have created. Also, you can define how you want to run this task. The options for it are **Manually** (when you like), **On connection** (every time you connect your Nokia 9210i Communicator to your PC) or **At scheduled time** (e.g. every Monday at 9:15 if the Nokia 9210i Communicator is connected to your PC).

Press the **Finish** button when everything is ready.

2.2 CONTACTS

After PC software selection, the PC Suite for the Nokia 9210i Communicator analyses the PC software you have selected. This takes few seconds. The following window will then appear.

In the summary field you can see all the default details for this task. You can modify these settings by pressing the **Change** button or accept them by pressing the **Next** button.

When you are modifying these settings you will see the following screens.

On the first sheet, you can specify what kind of contacts data you want to synchronize.

On the second sheet, you define what will happen if there is conflict between the PC and Nokia 9210i Communicator contact data. You can also select the direction of the synchronization.

The last sheet contains all the PC software specific settings. The layout of the sheet depends on which PC software you have selected. The figures below illustrate the Lotus Notes and the Microsoft Outlook sheets. Here you can specify the location of the contact database in the PC software, the profile settings and the password, if it is required.

When the settings are correct in all the sheets, press the **OK** button to return to the previous screen and press the **Next** button to continue.

The image displays two side-by-side 'Schedule Task' dialog boxes. Both dialogs have a title bar with 'Schedule Task' and a close button. The left dialog shows 'Task Type: Contacts Synchronization', 'Task Name: Lotus Notes 4.5/4.6 Contacts Synchronization', and 'Run Task: Manually'. The right dialog shows 'Task Type: Contacts Synchronization', 'Task Name: Microsoft Outlook 97/98/2000 Contacts Synchronization', and 'Run Task: Manually'. Both dialogs have a 'Scheduling Options' section with 'Run Task: Manually' and a 'Change...' button. At the bottom, there is a checkbox 'Include this task in Unify tasks' which is checked, and four buttons: '< Back', 'Finish', 'Cancel', and 'Help'.

Now you can give a name to the task you just have created. Also, you can define how you want to run this task. The options for it are **Manually** (when you like), **On connection** (every time you connect your Nokia 9210i Communicator to your PC) or **At scheduled time** (e.g. every Monday at 9:15 if the Nokia 9210i Communicator is connected to your PC).

Press the **Finish** button when everything is ready.

2.3 E-MAIL

After PC software selection, the PC Suite for the Nokia 9210i Communicator analyses the PC software you have selected. This takes few seconds. The following window will then appear.

In the summary field you can see all the default details for this task. You can modify these settings by pressing the **Change** button or accept them by pressing the **Next** button.

When you are modifying these settings you will see the following screens.

On the first sheet, you can define all the settings for synchronizing your e-mail.

On the second sheet, you can define what will happen if there is conflict between the PC and Nokia 9210i Communicator contact data. You can also select the direction of the synchronization.

The last sheet contains all the PC software specific settings. The layout of the sheet depends on which PC software you have selected. The figures below illustrate the Lotus Notes and the Microsoft Outlook sheets. Here you can specify the location of the contact database in the PC software, the profile settings and the password, if it is required.

When the settings are correct on all sheets, press the **OK** button to return to the previous screen and press the **Next** button to continue.

Now you can give a name to the task you just have created. Also, you can define how you want to run this task. The options for it are **Manually** (when you like), **On connection** (every time you connect your Nokia 9210i Communicator to your PC) or **At scheduled time** (e.g. every Monday at 9:15 if the Nokia 9210i Communicator is connected to your PC).

Press the **Finish** button when everything is ready.

3. RUN TASK

When you want to run a task, first connect your Nokia 9210i Communicator to your PC. Next, select the task you want to run and from the **Task** menu select **Run Now** or press the **Run the selected task** button

You can also click the right mouse button when mouse cursor is over the task and select **Run Task**.

The synchronization task will now begin.
