1. INTRODUCTION

To obtain access to WAP services

- you must be within the coverage of a network which supports data calls,
- a data service must be activated for your SIM card,
- you must have obtained a WAP access point from a WAP service provider, and
- you must have entered the proper WAP settings.

Before you can use the WAP services, you need to configure your WAP settings. Your WAP service provider will provide you with the exact values for the WAP settings. Follow the instructions carefully. You can use this information to define and edit the settings manually.

Also, your service provider may be able to send some, or all, of the required settings to you via a special short message called an Over The Air (OTA) message. After you have received the settings, you can start using the WAP application or edit the settings as described below.

Note: The necessary settings for WAP configuration are provided by your WAP Service Provider. Depending on your service provider, you may not need to fill in all of the settings

2. WAP ACCESS POINTS

2.1 DEFINING WAP ACCESS POINTS

To set up a new WAP access point, open **Internet startup** under the Extras application, and select **WAP access** (a shortcut to Internet startup can also be found in the Desk application).

1. Open *Internet startup* from Desk or from under Extras.
2. Select *WAP access* and press **Open**.
3. Fill in the following settings.
Contact your WAP service provider for the correct settings.
 - *Name* - Create a name for the access point that you can recognise easily.
 - *Secure connection* - Choose whether to *Use secure connection*, according to your service provider's instructions.
 - *Internet access* – From a selection list, choose the Internet Access Point (IAP) you want to use for this connection. If you have no configured IAP's, you can create a new one by pressing **New Internet access**.
 - *Gateway IP address* - Type in the IP address that the WAP gateway uses.
4. Press **Close** to exit the WAP access point settings.

2.2 SETTING A HOME PAGE

1. Press the Internet button and open the WAP application.
2. Press the Menu key, and open the *Settings* dialog under the *Tools* menu.
3. To activate the *Home page* tab, press the Menu button.
4. Type in the WAP home page URL.
5. Choose the WAP access point you want to use.
6. Press **Done** to exit the WAP settings.
