Backing up data

The purpose of this support guide is to help you create backup copies of your device's contents. You can create these copies on your memory card or on a compatible PC that has the PC Suite application installed.

Before you begin creating backup files, do the following:

- Close all other applications.
- Make sure you have enough battery power.

On memory card

Before starting the backup process, make sure that a compatible micro Secure Digital (microSD) card is inserted in your device.

To back up information from device memory to a memory card, select *Menu > Tools > Memory card > Options > Backup phone mem.*

Do not remove a memory card when the card is being accessed. Removing the card in the middle of an operation may damage the memory card as well as the device, and data stored on the card may be corrupted.

On PC

- 1 Connect your Nokia E61i to a PC that has Nokia PC Suite for the Nokia E61i installed.
- 2 Open *Nokia PC Suite* for the Nokia E61i on the PC, and click *Backup*. The *Nokia Content Copier* opens.
- 3 Make sure the application recognises your device. If the device is not correct, make sure it is connected correctly, and click *Select Phone* to select the right device.
- 4 Click *Back Up* to continue.

- 5 The backup operation begins. To stop the backup, click [Cancel](#).

- 6 After the backup has finished, Nokia Content Copier displays a status report of the operation. Click [Close](#) to finish and close Nokia Content Copier or [View log](#) to view details of the backup.

Restoring backup data

From memory card

To back up information from device memory to a memory card, select [Menu](#) > [Tools](#) > [Memory card](#) > [Options](#) > [Restore from card](#).

Do not remove a memory card when the card is being accessed. Removing the card in the middle of an operation may damage the memory card as well as the device, and data stored on the card may be corrupted.

From PC

- 1 Connect your Nokia E61i to a PC that has Nokia PC Suite for the Nokia E61i installed.
- 2 Open [Nokia PC Suite](#) for the Nokia E61i on the PC, and click [Backup](#). The [Nokia Content Copier](#) opens.
- 3 Make sure the application recognises your device. If the device is not correct, make sure it is connected correctly, and click [Select Phone](#) to select the right device.

- 4 Click [Restore](#) to continue.

- 5 Select the data you want to restore, and define the file that contains the backup data. When you are done, click **OK** to continue.

- 6 The data is restored to your Nokia E61i. To stop the data transfer, click **Cancel**.

- 7 Select **OK** to restart your Nokia E61i.
- 8 After the restore has finished, click **Close** to finish and close Nokia Content Copier or **View log** to view details of the restore.
