# Transferring data to your Nokia E61i

➡ Select *Menu* > *Tools* > *Transfer*.

You can transfer content from a compatible Nokia device to your Nokia E61i using Bluetooth connectivity or infrared. The type of content that can be transferred depends on the phone model. If the other device supports synchronisation, you can also synchronise data between the other device and your Nokia E61i. For more information on compatible devices, contact your dealer, operator, or service provider.

Using a Bluetooth or infrared connection, you can synchronise your calendar and contact entries between the two devices. You can choose to transfer all of the data, or define the categories of data that you wish to move.

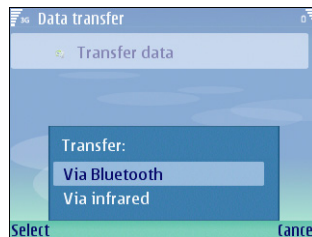

Because device models are designed differently, there may be differences in the way they handle data transfer. For example, your Nokia E61i allows you to enter a great deal

of contact information for each contact. Another device model may only allow a few details per contact. If you synchronise contact information between these two devices, some of the data may be transferred to an incorrect field, and some data may not be transferred at all.

## Bluetooth transfer

To transfer data to your Nokia E61i:

- 1 Select *Menu* > *Tools* > *Transfer*.
- 2 Select *Transfer data* to begin data transfer.
- 3 Select *Via Bluetooth*. Both devices must support the selected connection type.

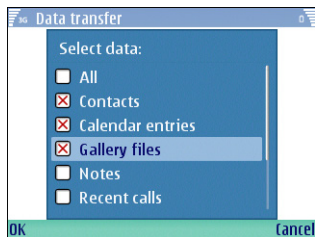

- 4 Activate Bluetooth in your other device, and select *Continue* in your Nokia E61i to start searching for devices with active Bluetooth connectivity.

- 5 Select [Stop](#) in your Nokia E61i after it has found your other device.
- 6 Select your other device from the list. You are asked to enter a passcode (1 to 16 digits) on your Nokia E61i. The passcode is used only once to confirm this connection.
- 7 Enter the passcode on both devices. The devices are now paired. For more information on pairing devices, see Nokia E61i User Guide.

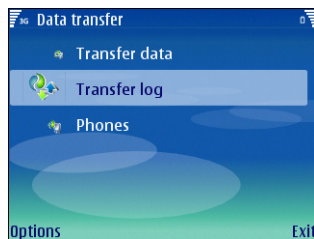

**Tip:** For some phone models, the [Transfer data](#) application is sent to your other device as a message. To install [Transfer data](#) on your other device, open the message, and follow the instructions on the display.

- 8 From your Nokia E61i, select the content you want to transfer from your other device by scrolling the list and pressing the joystick, and select [OK](#) when you have chosen all content types you want to transfer.

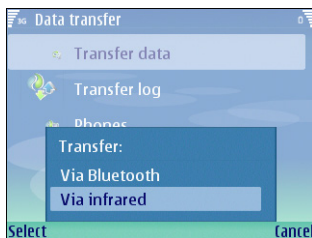

Content is copied from the memory of the other device to the corresponding location in your device. Copying time depends on the amount of data to be transferred. You can also cancel and continue later. After the transfer is over, you can view [Transfer log](#) in the [Data transfer](#) menu.

The necessary steps for data transfer may vary depending on your device, and whether you have interrupted data transfer earlier. The items that you can transfer vary depending on the other device.

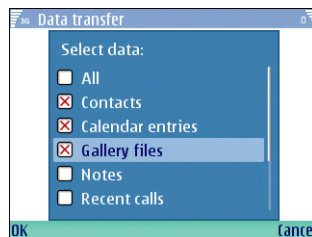

## Infrared transfer

- 1 Select [Menu > Tools > Transfer](#).
- 2 Select [Transfer data](#) to begin data transfer.
- 3 Select [Via infrared](#). Both devices must support the selected connection type.

- 4 Activate infrared in the other phone (for more details, see the other phone's user guide) and press [Continue](#). Wait a few seconds until an infrared connection is established.

- 5 From your Nokia E61i, select the content you want to transfer from your other device by scrolling the list and pressing the joystick, and select [OK](#) when you have chosen all content types you want to transfer.

After the transfer is over, you can view [Transfer log](#) in the [Data transfer](#) menu.

# Transferring telephone numbers using a SIM card

You can copy all or some of the phone numbers on a GSM phone to your Nokia E61i. Duplicate contacts will be created if the same contact already exists on your Nokia E61i. These duplicate contacts can be deleted manually afterwards.

To copy telephone numbers using a SIM card:

- 1 Copy the numbers you wish to move from another GSM phone to the SIM card, following the instructions provided in the user guide of the phone.
- 2 Move the SIM card to the Nokia E61i.
- 3 On the Nokia E61i, select *Menu* > *Contacts* > *Options* > *SIM contacts* > *SIM directory* to open the SIM directory.
- 4 Mark the contacts you want to copy, or select *Mark all* to copy all contacts.
- 5 Select *Options* > *Copy to Contacts*.

Select *Options* > *SIM contacts* > *SIM directory* to see the names and numbers stored on the SIM card. In *SIM directory* you can add, edit, or copy numbers to *Contacts*, and you can make calls.
