1. INTRODUCTION

This guide briefly describes how to begin using the Nokia PC Suite 5.62 and applications included with the installation package.

2. SYSTEM REQUIREMENTS

To use the Nokia PC Suite 5.62 you need:

- A PC equipped with Windows 98 SE, Windows ME, Windows 2000, Windows XP Operating System
- At least 150 Mb of free disk space
- IrDA port supporting FIR protocol or USB port (requires Nokia DKU-5 USB-connection cable and DKU-5 device drivers)
- It is also assumed that you have installed the Nokia PC Suite 5.62
 - Please note that in case you are using the Nokia DKU-5 Connectivity Cable, the cable driver should be installed before installing Nokia PC Suite.

The Nokia PC Suite 5.62 supports the following Nokia phones:

- Nokia 6220 Phone
- Nokia 5100 Phone
- Nokia 6100 Phone
- Nokia 6610 Phone
- Nokia 6650 Phone
- Nokia 6800 Phone
- Nokia 7210 Phone
- Nokia 7250 Phone
- Nokia 7250i Phone
- Nokia 8910i Phone*

* Nokia Phone Browser and Nokia Sound Converter are not supported.

Additionally, you can use the PC Suite 5.62's Content Copier to transfer phone contents to your Nokia phone also from these Nokia models:

- 
- Nokia 8910 Phone
 - Nokia 8310 Phone
 - Nokia 6510 Phone
 - Nokia 6310i Phone
 - Nokia 6310 Phone

Additionally, you can use the PC Suite 5.62's Content Copier to transfer phonebook contents and calendar items to your Nokia phone also from these Nokia models:

- Nokia 5210 Phone**
- Nokia 6210 Phone
- Nokia 6250 Phone
- Nokia 7110 Phone
- Nokia 8210 Phone**
- Nokia 8850 Phone**

** only contacts can be transferred

3. A NOKIA PHONE USING THE NOKIA PC SUITE

PC Suite 5.62 features:

Nokia Connection Manager

Nokia PC Sync

Nokia Phone Editor

- Contact Editing
- SMS (supports long messages)

Nokia Phone Browser

Nokia Settings Manager

Nokia Content Copier

Nokia Application Installer

Nokia Image Converter

Nokia Sound Converter

Nokia Modem Options

Nokia Multimedia Player

3.1 NOKIA CONNECTION MANAGER

Nokia Connection Manager allows you to choose the connection type used when connecting your PC and your phone. When a connection type is selected (highlighted in green) it shows the phone that is connected to your PC, if you have multiple connection types selected you can select the correct phone by selecting it from the list and then click Apply. The currently selected phone has a small phone icon on the left side.

3.2 NOKIA PC SYNC

Synchronize calendar and contact data with Microsoft Outlook (97, 98, 2000, 2002), Microsoft Outlook Express (Windows Address Book), Lotus Organizer (5.0 and 6.0) and Lotus Notes (5.0 and 6.0) using Nokia PC Sync.

When PC Sync is ready for synchronization you will see  icon on the taskbar in the bottom right-hand corner of the screen.

If PC Sync is not ready the  icon will appear.

You can begin synchronization from the user interface of PC Sync by clicking the "Synchronize Now" button or by "right-clicking" the mouse on the PC Sync icon on the taskbar in the bottom right-hand corner of your screen and selecting "Synchronize" from the menu (Picture 1).

Picture 1. Nokia PC Sync taskbar menu

3.3 NOKIA PHONE BROWSER

With Nokia Phone Browser, you can manage the contents of some of your phone's folders through Windows Explorer, as well as open other PC Suite applications from there.

The Phone Browser consists of local folders (for example, My Photos, My Graphics, and My Tones) and phone folders for each phone that has been connected to the PC. Phone subfolders show the applicable folders whenever the phone is connected to the PC.

3.4 NOKIA PHONE EDITOR

Nokia Phone Editor allows you to manage various phone functions easily from a PC.

Phonebook allows you manage contact information in the phone and PC memories. You can add and edit contacts, copy and move contacts from one memory to another, and send business cards as text messages to other GSM subscribers.

Picture 2. Nokia Phone Editor

Messages enables you to read, write and send text messages directly from your PC. You can organise messages into folders on the PC memory. The messages application enables you to manage text messages in the same way that you manage e-mail. You can send and receive messages, reply to a message, forward a message and organise messages into folders.

In the message main view, messages are organised into folders:

- Inbox folder
- Outbox folder
- Own Messages folder
- Sent Messages folder
- Drafts folder
- PC folder
- Deleted Messages

You can not make data calls with your phone while Nokia Phone Editor is active. Also, you cannot use Nokia Phone Editor while you are making a data call

3.5 NOKIA SETTINGS MANAGER

The Nokia Settings Manager provides an easy way to edit access point settings, bookmarks and radio settings for your phone using your PC.

Select the **Services** or **Radio** and navigate through different settings pages.

Picture 3. Nokia Setting Manager

RADIO:

With the Radio application, you can find new radio channels for a compatible Nokia phone when the phone is connected to the PC. You can view the channels that are currently saved to the phone and search and save new channels. You can also rename radio channels saved to your phone.

With the radio application you can:

- View the radio channels that are saved to you phone
- Find the new radio channels and save them to your phone
- Edit radio channels
- Rename channels in the phone
- Delete channels from your phone
- View phone radio channels on the PC

Picture 5. Radio application

SERVICES:

With the services application, you can manage the browser settings of your phone on a PC.

Picture 4. Services application

- Add and manage bookmarks
- Edit and activate service sets
- Transfer bookmarks and service sets between a file on your PC and a compatible phone
- Send bookmarks and service sets from your phone to another supported Nokia phone

The Service Settings available in Nokia Setting Manager depend on the phone you are using. Different phones may allow different bearer options (For example GSM and /or GPRS).

To open the Service Settings dialog, click on the **Service Sets** tab, select the set of service settings you want to edit and click **Edit** button.

You can activate a set of **browser settings** in your phone with the services application. The currently set is activated is marked with a red tick.

3.6 NOKIA APPLICATION INSTALLER

With the Nokia Application Installer you can download java applications from your PC to your phone.

Before you begin the installation, the .JAD and .JAR files of the application to be installed must be saved on your PC. When installing the application via Nokia Application Installer, you only need to download the .JAD file, which then finds the .JAR file automatically if the two have been saved in the same folder.

3.6.1 To install an application in the phone

1. Connect your phone to the PC.
2. Open Nokia Application Installer.
3. Click Install... on the tool bar or select it from the File menu.
 - If more than one phone is connected to the PC, a dialog will open asking you to select the phone where you want to install the application.
4. An installation dialog box opens. Browse to the folder where you have saved the .JAD and .JAR files.
5. Select the .JAD file of the application you want to install and click Install.
6. An information box will appear when the installation is complete.

3.7 NOKIA IMAGE CONVERTER

With Nokia Image Converter you can

- optimize the image for your phone
- update the image into your phone
- save the image on your PC (.bmp, .gif, .jpeg, .jpg, .otb, .wbmp)
- open the image from your PC (.bmp, .gif, .jpeg, .jpg, .otb, .png, .wbmp)
- edit picture with filters and effects
 - Note: The maximum size of an image that can be opened in Nokia PC Suite's Image Converter is 1500x1500 pixels.

Supported image sizes/types:

- Wallpapers (128x128 pixels)
- MMS pictures (122x96 pixels)

3.8 NOKIA SOUND CONVERTER

With Nokia Sound Converter you can

- optimize and convert a polyphonic ringing tone for your phone (OTA and MIDI files)
- play the tone
- open ringing tones from PC in:
 - .mid, .rmi, .ott, .rtpl, .nrt format
 - save the tone on your PC in MIDI format
 - update the tone into your phone

Note: If the MIDI file contains very complex percussions, the file may not be uploaded to the Nokia phone. In this case, percussion should be moved down in the Nokia sound converter.

3.9 NOKIA MULTIMEDIA PLAYER

With Nokia Multimedia Player, you can view MMS message files, audio and video files, as well as images in the most common image formats. You can play files that are on your PC or straight from the phone when your phone is connected to the PC. You can also create playlists of your favorite multimedia files with the player.

Picture 6. Nokia Multimedia Player

You can change the playing properties of the player and set, for example, Nokia Multimedia Player as the default player for the file types you want.

You can also save video and audio files in a format that allows using them in a compatible mobile phone or attaching them to an MMS message.

There are several file formats that you can view with Nokia Multimedia Player. For exact information of the supported formats, see the **View --> Options --> Formats** tab.

With Nokia Multimedia Player you can:

- Play media files/still files/MMS messages
- Pause playing
- Stop playing
- Skip to another file in the playlist
- Open the multimedia files from the file browser
- Change the current position of the media clip with the Seek bar
- Show/Hide playlist
- View the player in full screen
- Control Volume
- Create/edit playlists

Converting files into another format:

The file formats that can be converted in Nokia Multimedia Player are:

- Video files: avi, _mpeg, _QuickTime (QuickTime player 5.0.0.1 or later must be installed on the PC)
- Audio files: wav, mp3

The files can be converted either with “MMS” or “Custom” settings.

Please note that there are certain limitations for the size of the converted files. The maximum size for an “MMS” option file is 95KB. If the file does not fit the size limit, the end of the file is not converted. File saved with “Custom” option can be longer, but they cannot be used for MMS messages.
