PC Suite for Nokia 6600 for Windows Vista

BLUETOOTH CONNECTION GUIDE

NOKIA

Follow the steps explained below to make the Nokia 6600 Bluetooth connection work when using Windows Vista.

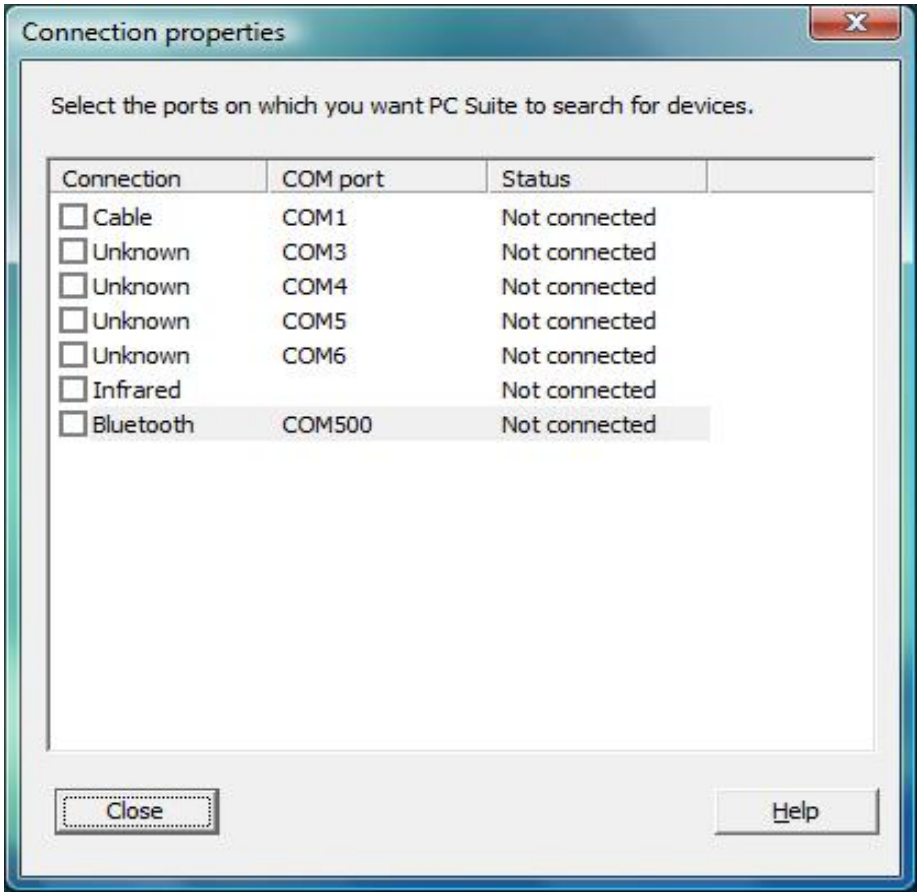
Note: Do not try to pair your phone with a Vista computer using Bluetooth until you are instructed to do so in this guide.

Step 1

- Install PC Suite for Nokia 6600 as usual.
- After the reboot and installation has ended, open the mRouter application properties by double-clicking the mRouter icon in the taskbar.

Step 2

- Uncheck all connections from the list of possible connections.

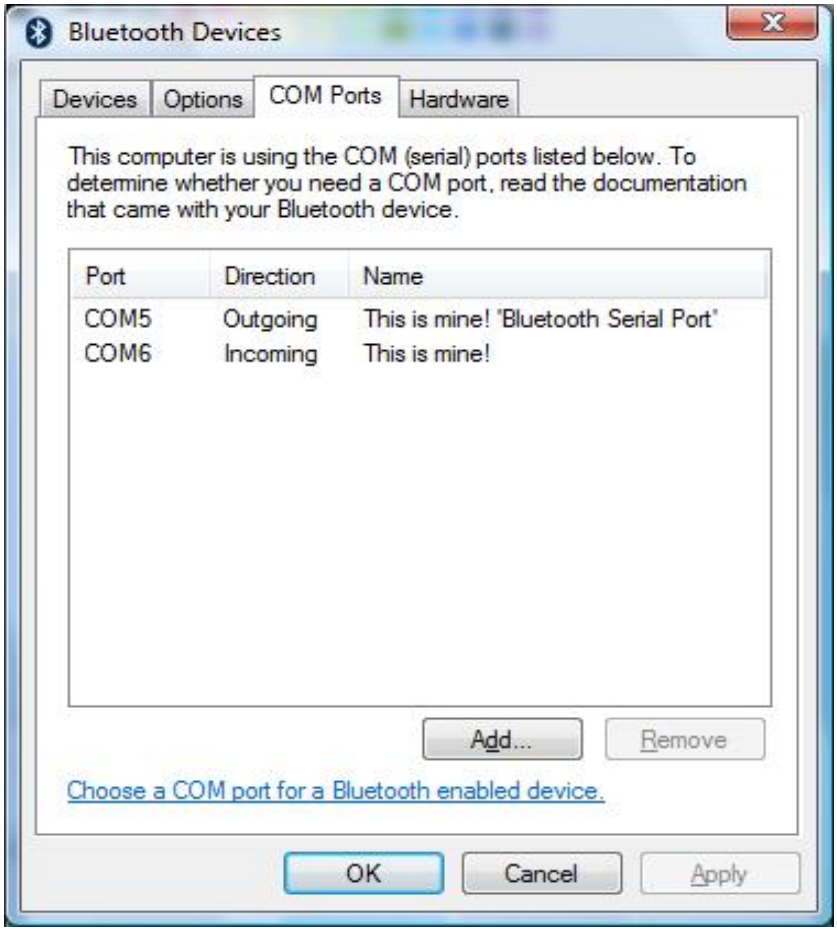


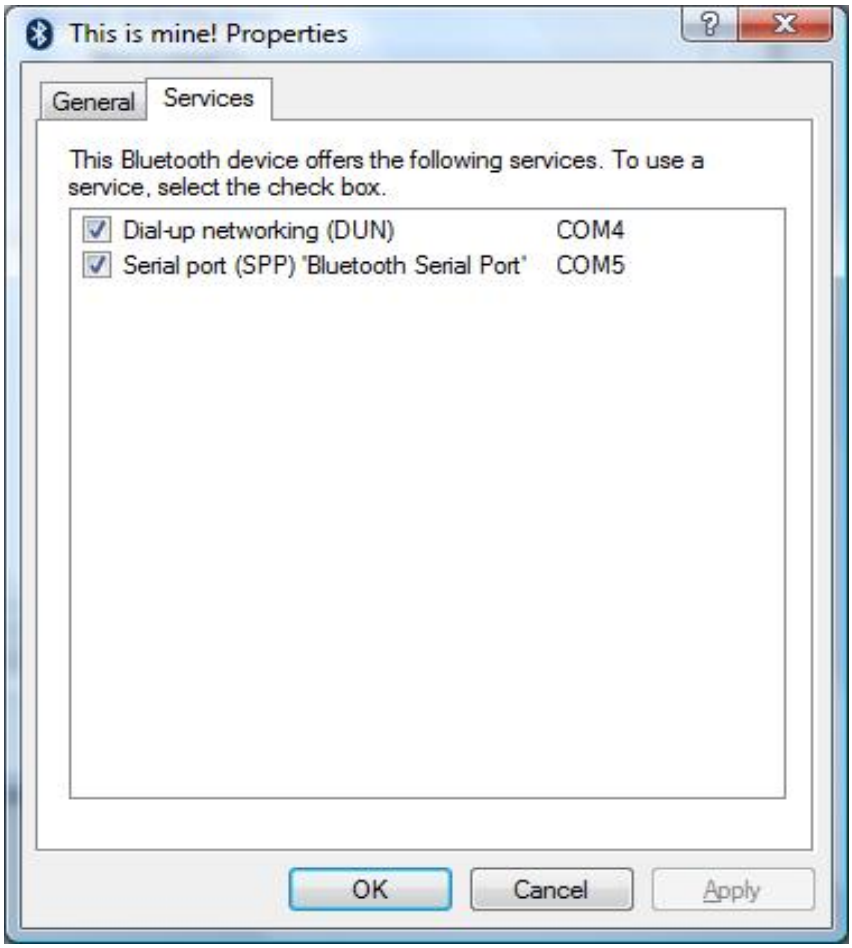
Step 3

- Pair your phone normally using a Bluetooth connection.

Step 4

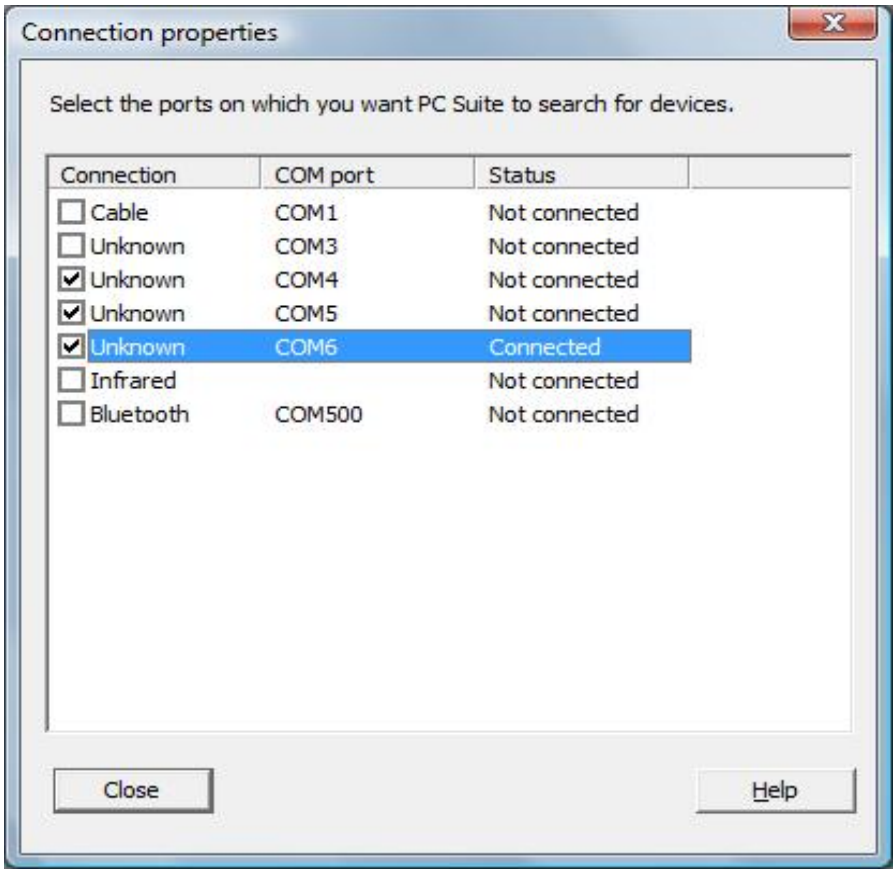
- Verify the used COM ports from the Bluetooth and device properties.





Step 5

- Check the used COM ports in the mRouter properties.



Result

- After a few moments a ‘Connected’ message appears on one of the COM ports.
- Now PC Suite for Nokia 6600 is ready to be used using Bluetooth connection.

Note: Accept all security check queries both in Windows and on the phone’s display during the installation and first start-up.

Note: Microsoft Outlook asks you to confirm synchronisation.

Removing pairing

- Open Bluetooth Devices in the Control Panel.
- Select your phone and click **Remove**.
- Click **OK** when finished.
- Reopen Bluetooth Devices and check that your phone is removed and the **COM Ports** tab does not show any COM ports with your phone's name on them.
