1. INTRODUCTION

This guide briefly describes how to begin using the Nokia PC Suite 5.1 and applications included with the installation package.

2. SYSTEM REQUIREMENTS

To use the Nokia PC Suite 5.1 you need:

- A PC equipped with Windows 98*, Windows 98 SE, Windows ME, Windows 2000, Windows XP Operating System

* Requires Microsoft Outlook 97 or newer version

- At least 150 Mb of free disk space
- It is also assumed that you have installed the Nokia PC Suite 5.1
 - Please note that it is recommended to install the Nokia DKU-5 USB cable drivers before installing Nokia PC Suite
- IrDA port supporting FIR protocol or USB port (requires Nokia DKU-5 USB-connection cable and DKU-5 device drivers)

The Nokia PC Suite 5.1 supports the following Nokia phones:

- Nokia 6800 Phone
- Nokia 7250 Phone
- Nokia 5100 Phone
- Nokia 6100 Phone
- Nokia 6610 Phone
- Nokia 7210 Phone
- Nokia 8910i Phone*

*Nokia Phone Browser and Nokia Sound Converter are not supported

You can use the PC Suite 5.1's Content Copier to transfer phone contents to your Nokia Phone from these Nokia models:

- Nokia 8910 Phone
- Nokia 8310 Phone
- Nokia 6510 Phone

- Nokia 6310i Phone
- Nokia 6310 Phone

You can use the PC Suite 5.1's Content Copier to transfer phonebook contents and calendar items to your Nokia Phone from these Nokia models:

- Nokia 5210 Phone**
- Nokia 6210 Phone
- Nokia 6250 Phone
- Nokia 7110 Phone
- Nokia 8210 Phone**
- Nokia 8850 Phone**

** only contacts can be transferred

3. A NOKIA PHONE USING THE NOKIA PC SUITE

PC Suite 5.1 features:

Nokia Connection Manager

Nokia PC Sync (Only briefly introduced. Separate Support Guide available)

Nokia Phone Editor

- Contact Editing
- SMS (supports long messages)

Nokia Phone Browser (Separate Support Guide)

Nokia PC WAP Manager

Nokia Content Copier (Separate Support Guide)

Nokia Application Installer

Nokia Image Converter

Nokia Sound Converter (Separate Support Guide)

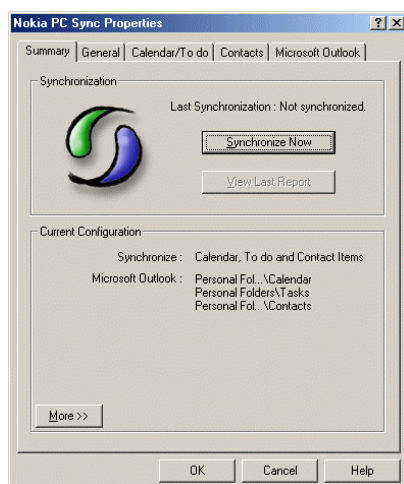

Nokia Modem Options (Separate Support Guide)

3.1 NOKIA CONNECTION MANAGER

Nokia Connection Manager allows you to choose the connection type used when connecting your PC and your phone. When a connection type is selected (highlighted in green) it shows the phone that is connected to your PC, if you have multiple connection types selected you can select the correct phone by selecting it from the list and then click Apply. Currently selected phone has a small phone icon on the left side.

3.2 NOKIA PC SYNC

Synchronize calendar and contact data with Microsoft Outlook (97, 98, 2000, 2002), Lotus Organizer (5.0 and 6.0) and Lotus Notes (5.0 and 6.0) using Nokia PC Sync picture 2.

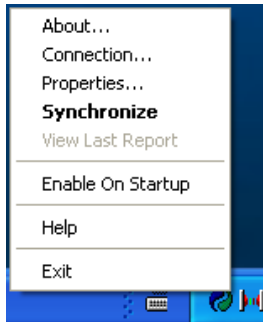

Picture 2. Nokia PC Sync User Interface

When PC Sync is ready for synchronization you will see  icon on the taskbar in the bottom right-hand corner of the screen.

If PC Sync is not ready the  icon will appear.

You can begin synchronization from the user interface of PC Sync by clicking the “Synchronize Now” button or by “right-clicking” the mouse on the PC Synch icon on the

taskbar in the bottom right-hand corner of your screen and selecting “Synchronize” from the menu (Picture 3). Please note that if you choose “New Synchronization” from “Start – Programs - Nokia PC Suite” your old settings will be deleted.

Picture 3.

3.3 NOKIA PHONE BROWSER

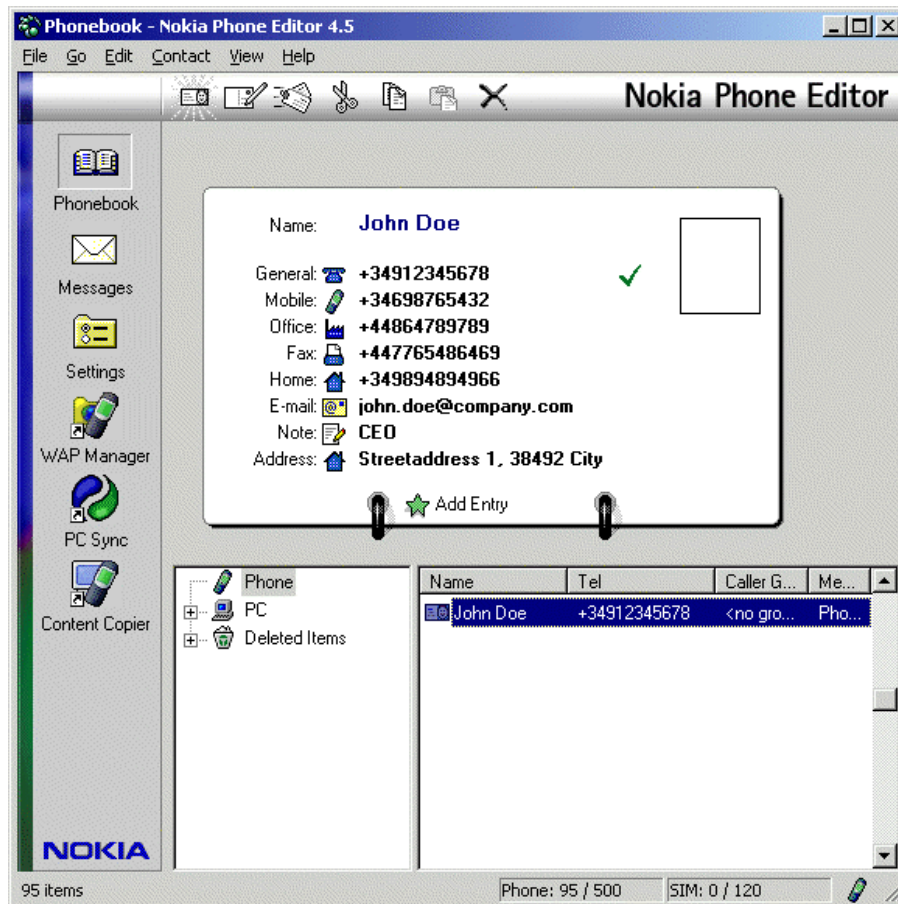

With Nokia Phone Browser, you can manage the contents of some of your phone's folders through Windows Explorer, as well as open other PC Suite applications from there.

The Phone Browser consists of local folders (for example, My Photos, My Graphics, and My Tones) and phone folders for each phone that has been connected to the PC. Phone subfolders show the applicable folders whenever the phone is connected to the PC.

3.4 NOKIA PHONE EDITOR

Contact editing. Allow you to do the following:

- Store your contacts on your PC's hard disk
- Create new contacts from your PC
- Create your own business cards
- Send and receive business cards

Picture 6.

SMS (short messages):

- You can send long messages (concatenated)
- Write messages without phone connected (messages will be sent the next time you connect your phone)
- Store messages on your PC's hard disk
- Print messages
- Save messages as txt files on your PC's hard disk

Settings:

- You can edit your phone's settings (like Message centre settings, Accessory settings...)

3.5 NOKIA PC WAP MANAGER

With Nokia PC WAP Manager you can make, edit and save your WAP service sets and WAP bookmarks. Both WAP service sets and WAP bookmarks can be exported to a file and the file can contain either only the WAP service sets or WAP bookmarks or both. Also when importing saved files you can select if you wish to import i.e. only the bookmarks even if the file contains the WAP service settings also. Exported files have ending .wap and only those can be imported to Nokia PC WAP Manager.

When you start the Nokia PC WAP Manager (Picture 7.) it will try to connect to your Nokia phone and retrieve the settings in there, so by default you can see the current service sets (Picture 8.) in Nokia PC WAP Manager.

Please also note that all the changes you make are automatically saved in to phone.

Picture 7. Nokia PC WAP Manager main window

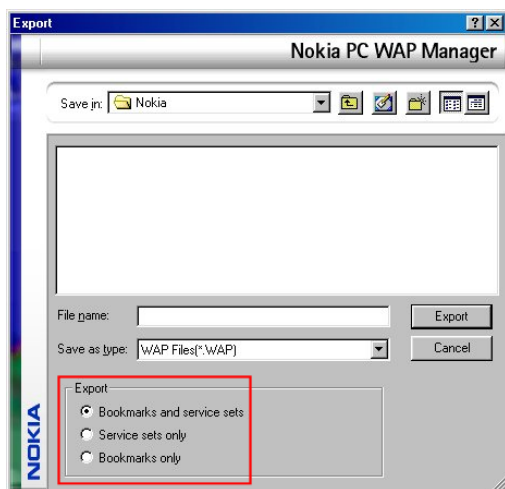

Picture 8. Service sets Window

In Nokia PC WAP Manager you can:

- add/edit/delete WAP bookmarks
 - add: you will be prompted to enter WAP address and bookmark title
 - edit: you can change the WAP bookmarks details
 - delete: deletes the selected WAP bookmark
- save WAP bookmarks to PC hard disk (File – Export)
- open WAP bookmarks from PC hard disk (File – Import)
- send WAP bookmarks via SMS
- edit/rename/activate Service sets (maximum 5 Service sets)

- edit: you can edit the service settings (Service settings details you can get from your GSM or WAP service provider)
- rename: you can change the name of the service set (this name will be shown in list of sets in your phone)
- activate: makes the currently selected service set the default set in your phone
- save service sets to PC hard disk (File – Export)
- import WAP bookmarks from PC hard disk (File – Import)

Below is a picture (Picture 9) of a "Export service sets and Bookmarks to file" –dialogue box. There you can select which items (marked red in the picture) you wish to save on your hard disk.

Picture 9. "Export service sets and Bookmarks to file" –dialogue box.

3.6 NOKIA APPLICATION INSTALLER

With the Nokia Application Installer you can download java applications from your PC to your phone.

Before you begin the installation, the .JAD and .JAR files of the application to be installed must be saved on your PC. When installing the application via Nokia Application Installer, you only need to download the .JAD file, which then finds the .JAR file automatically if the two have been saved in the same folder.

3.6.1 To install an application in the phone

1. Connect your phone to the PC.
2. Open Nokia Application Installer.
3. Click Install... on the tool bar or select it from the File menu.

- 
- If more than one phone is connected to the PC, a dialog will open asking you to select the phone where you want to install the application.

4. An installation dialog box opens. Browse to the folder where you have saved the .JAD and .JAR files.

5. Select the .JAD file of the application you want to install and click Install.

6. An information box will appear when the installation is complete.

3.7 NOKIA IMAGE CONVERTER

With Nokia Image Converter you can

- optimize the image for your phone
- update the image into your phone
- save the image on your PC (.bmp, .gif, .jpeg, .jpg, .otb, .wbmp)
- open the image from your PC hard disk (.bmp, .gif, .jpeg, .jpg, .otb, .png, .wbmp)

Supported image sizes/types:

- Wallpapers (128x128, 4096 Colours)
- MMS pictures (122x96, 256 Colours)

3.8 NOKIA SOUND CONVERTER

With Nokia Sound Converter you can

- optimize and convert the polyphonic ringing tone for your phone (OTA and MIDI files)
- play the tone
- Open ringing tones from PC hard disk in:
 - .mid, .rmi, .ott, .rtpl, .nrt format
 - Save the tone in to PC hard disk in MIDI format
- update the tone into your phone
