Using Contact Download Application

This document describes the use of the **Contact download** application (contact_sync) in the Nokia 9500 Communicator device when using a Bluetooth connection and the Bluetooth SIM Access Profile mode (remote SIM access) with the Nokia 610 Car Kit Phone. The Contact download application is used to download contacts from a Nokia 9500 Communicator to a Nokia 610 Car Kit Phone and to forward SMS messages from a Nokia 610 Car Kit Phone to a Nokia 9500 Communicator.

Note that you can download contacts from a SIM card also without using the Contact download application.

To be able to use the application, you must have the following:

- A Nokia 9500 Communicator.
- A Nokia 610 Car Kit Phone installed.
- The latest available version of **contact_sync.sis** file.

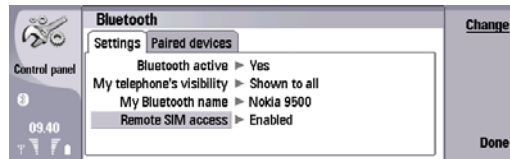

The Contact download application uses the language that is selected in the Nokia 9500 Communicator during the installation of the application. To change the language, change the language in the Nokia 9500 Communicator, and then re-install the Contact download application.

The Contact download application supports the following languages: English, German, Greek, Spanish, French, Italian, Dutch, Polish, Portuguese, Turkish, Serbian (Latin), Croatian, Polish, Finnish, Swedish, Danish, Norwegian,

Icelandic, Estonian, Latvian, Lithuanian, Russian, Ukrainian, Bulgarian, Romanian, Hungarian, Czech, Slovak, Slovenian.

Installing contact_sync file

- 1 Switch on the Nokia 9500 Communicator, including the cover phone.
- 2 In the Nokia 9500 Communicator, select **Desk**→**Tools**→**Control Panel**→**Connections**→**Bluetooth**. Set a Bluetooth name for the Nokia 9500 Communicator, and enable Bluetooth and remote SIM access. If there is an existing pairing with a Nokia 610 Car Kit Phone, remove it.

- 3 Install the **contact_sync** application. By default, it is installed to the **MMC Apps** folder.
- 4 Go to the **MMC Apps** folder and start the application. The first time you start the application, it asks if you want it to start automatically when the device is

switched on. If you select **Yes**, the application starts automatically to the background each time you switch on the device.

After the application is started, it appears in the tasks list. Note that the contact transfer is initiated from the Nokia 610 Car Kit Phone, not from the Contact download application in the Nokia 9500 Communicator.

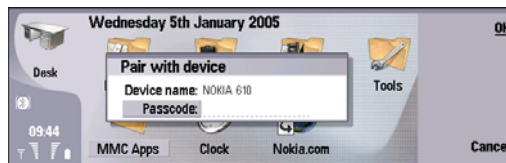

- 5 Switch on the Nokia 610 Car Kit Phone. If this is the first time you are using the Nokia 610 Car Kit Phone, select a language.

After this, select to use the remote SIM access, and start to search for available Bluetooth devices. In the list of found devices, scroll and select your Nokia 9500 Communicator.

The Bluetooth connection requires a separate, 16-character passcode. When requested, enter the 16-character passcode in the Nokia 9500 Communicator.

You get the passcode from the Nokia 610 Car Kit Phone.

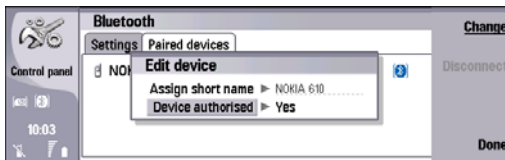

Next, the Nokia 9500 Communicator asks if you want to accept a Bluetooth connection from the Nokia 610 Car Kit Phone. When you accept it, the Nokia 9500 Communicator goes to the remote SIM access mode indicated by a SIM icon next to the Bluetooth icon and an icon showing that there is no network connection in the Nokia 9500 Communicator.

If PIN code request is on in the Nokia 9500 Communicator, the Nokia 610 Car Kit Phone asks you to enter it. Enter the PIN code, and if you do not want to enter it again, select to save the remote PIN code. Note that this is a security issue. For more information, see the Nokia 610 Car Kit Phone User's Guide.

- 6 When the Nokia 610 Car Kit Phone asks if you want to download contacts from the mobile phone, **answer No**.
- 7 In the Nokia 9500 Communicator, return to the **Bluetooth** menu and go to the **Paired devices** page. Edit the pairing with the Nokia 610 Car Kit Phone and set it as **authorised**. This simplifies using the remote SIM access mode in the future.

- 8 In the Nokia 610 Car Kit Phone, select **Menu**→ **User data**→ **Settings for User 1**→ **Download settings**→ **Download from**, and select to download from the phone memory, from the SIM card, or from both locations.
- 9 In Nokia 610 Car Kit Phone, select **Menu**→ **User data**→ **Download contacts**. After the download is complete, you see a short notice in the Nokia 9500 Communicator and on the display of the Nokia 610 Car Kit Phone.

Downloading contacts

To download contacts to Nokia 610 Car Kit Phone after the initial installation of the contact_sync application, do the following:

- 1 Switch on the Nokia 9500 Communicator, including the cover phone.
- 2 If you have not specified that the Contact download application will be started automatically, go to the **MMC Apps** folder and start the Contact download application.
- 3 Switch on the Nokia 610 Car Kit Phone.
- 4 Make sure the Nokia 610 Car Kit Phone connects to the the Nokia 9500 Communicator, and that the Nokia 9500 Communicator goes to the remote SIM access mode. This is indicated by the SIM icon and by the icon showing that there is no network connection in the Nokia 9500 Communicator.

- 5 In the Nokia 610 Car Kit Phone, select **Menu**→ **User data**→ **Download contacts**.

Note: Contacts are downloaded from the selected memory (phone memory, SIM card, or both). To change this setting, see step 8 in "Installing contact_sync file".

- 5 Recreate the pairing as instructed above in "Installing contact_sync file". Make sure that the Contact download application is running when you pair the devices.

Troubleshooting

If the contact download fails, do the following:

- 1 Remove the Bluetooth pairing in the Nokia 9500 Communicator.
- 2 Remove the Bluetooth pairing in the Nokia 610 Car Kit Phone:
 1. Switch off the Nokia 610 Car Kit Phone.
 2. Insert the SIM card into the SIM card reader of the Nokia 610 Car Kit Phone.
 3. Restart the Nokia 610 Car Kit Phone, and select [Use car SIM for this session](#) during the startup.
 4. After the Nokia 610 Car Kit Phone has logged onto the network, select [Menu](#) → [Bluetooth](#) → [View paired devices](#).
 5. Select the Nokia 9500 Communicator from the list of paired devices and press the wheel button.
 6. Select [Delete pairing](#) and confirm the deletion.
 7. Switch off the Nokia 610 Car Kit Phone and remove the SIM card. The Bluetooth pairing is now removed.
- 3 Insert the SIM card into the SIM card slot of the Nokia 9500 Communicator and switch on the device.
- 4 Restart the Nokia 610 Car Kit Phone by turning off the power of your car and then turning it back on.
